INDUSTRIAL PAINTING
PROFESSIONAL EQUIPMENT

For more than **68 years** we have worked hard to be the best at what we do, so you can be the best at what you do.

Since 1955

SAGOLA can trace its origins to the year 1955 and is fruit of the pioneering spirit of its founder, **Alejandro Sánchez Larrauri**.

It began as a small subcontracting workshop for industry. After some years in the subcontracting sector, Larrauri felt the need to manufacture his own product and progressively withdrew from subcontracted activity.

International expansion

Due once again to the entrepreneurial spirit of the SAGOLA team, the need was felt to open the company to the international market. For that reason the Company began operating in related markets such as Latin America, where it soon became the indisputable leader, later expanding to Arab countries, Asia and finally Europe. Today, SAGOLA is present in more than 80 countries worldwide.

SAGOLA has maintained the highest quality standards in the manufacture of its products from its very beginnings, which has contributed to becoming a very important competitor in sectors such as bodyshop and industry.

Elcometer Group

In 2020, SAGOLA has become part of a much larger business group. The ELCOMETER Group. Headquartered in the UK, Elcometer is also a family business and has been owned by the Sellars family for seven generations. Beginning in the 19th century as a chemical company, Elcometer, headquartered in Manchester, UK, has grown into one of the world's leaders in the design, manufacture and supply of equipment for the coating and non-destructive testing industries (END).

Elcometer exports more than 90% of the products it manufactures through its offices in France, Germany, Japan, the Netherlands, Singapore, the United Arab Emirates and the USA and its global distribution network that covers more than 170 countries throughout the world.

Like Sagola, the philosophy of the Elcometer company is to integrate quality into all aspects of the products they design and manufacture, while being very aware of the environment that surrounds us. Elcometer's commitment is reflected in its ISO 9001 and 14001 Quality and Environmental accreditations.

Evolution and Innovation

Since our beginnings, SAGOLA has always maintained the highest quality standards in its products and production processes, facilitating the most demanding coating processes.

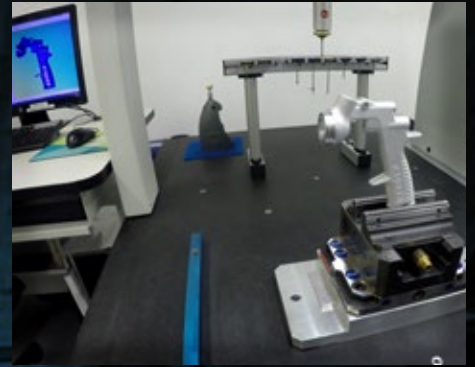

All of this has made SAGOLA what it is today, a company and a brand recognised not only in the domestic market, but in more than 80 countries worldwide.

**We have 68 years of experience
as manufacturers of spray guns and
spraying equipment**

After 68 years making and developing new products, we are convinced of the need to establish a close relation with our clients on a day-to-day basis.

We know that the best product is based on the proper development of what is demanded by the market at each moment in time. For that reason we constantly reinforce our training and sales and marketing personnel, which is in permanent contact with the market and its needs all over the world.

The quality of our products is acknowledged in more than eighty countries. SAGOLA has a vast experience and owns know-how in the manufacture of professional coating systems.

Human resources

SAGOLA is a worldwide benchmark brand thanks to the highly qualified professionals in our team. Notwithstanding, this team continues to work towards the objective of consolidating the SAGOLA brand as the industry yardstick.

**Strengthening our human resources
is SAGOLA's principal objective**

Since its inception, SAGOLA has been characterized by merging manufacturing technologies, production means and manufacturing processes with a highly qualified human team.

The high technical level of our production guarantees the high quality of our products.

Research and Development

Our commitment to R+D is absolutely clear. We devote all our efforts in this department to assuring that our products are adapted to the needs of the market.

Our objective is that between both parties and the innovations generated at our headquarters, clients will regard SAGOLA as a safe bet and stay loyal to a brand which researches on a day-to-day basis to develop products which answer their needs.

Optimisation and Self-improvement

When it comes to service we are talking about a deeply rooted culture arising from the history of SAGOLA, to which service is vital.

The robotic automation of all our warehouses is an example, a major investment which gives us an advantage over the competition when it comes to offering a fast, reliable response which the market appreciates.

The quality as a brand

If the SAGOLA brand plays an important role on the market after 67 years of history, this is due to the emphasis placed on QUALITY.

At our factory in Vitoria (Spain), each department you visit is steeped in an atmosphere of quality.

At the beginning the founder, Alejandro Sánchez, was able to transmit this vital concept and 67 years later his heritage on this point remains as vital as on the first day.

Warranty

SAGOLA provides a 3-year guarantee with the main products.

We know this is the best way of showing our customers that we believe in our products and that our guarantee will make our past and present customers loyal in the future.

From its very beginnings SAGOLA has showed marked interest in advances related to care of and **respect** for the **environment**.

Environment

Since the very first developments regarding VOC emissions to the atmosphere, SAGOLA wanted to be a cutting-edge company by implementing new environmental regulations and systems for its products.

With the inclusion of EPA and HVLP systems, as well as progress made in the field of filtration and others, we believe that we can contribute on a daily basis through new developments in our innovation policy.

Our commercial office and training team are amongst the pillars of the SAGOLA BRAND worldwide

Our training team and the entire company believes that there is an important difference between being merely a quality manufacturer and being a manufacturer which develops and trains workgroups for the various sectors in which we are present.

Sales and Marketing

We believe that the products we make always need a solid sales support. Our commercial partners all over the world appreciate our assistance in setting up their sales networks and technical teams.

Thanks to the efforts of both, we embark upon each new financial year resting on a solid base suitable for the construction of a long-term project. Courses are available both at our Vitoria headquarters and on site.

Customer service

This department is aware that our sales effort requires its support when responding to particular dilemmas, problems or needs related to specific queries we are constantly receiving from all over the world. These are transmitted rapidly to qualified experts who provide immediate data and solutions.

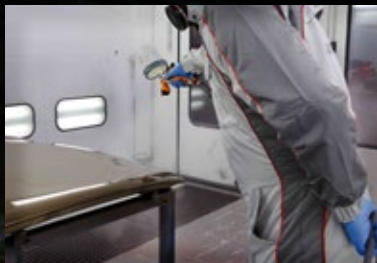

The sectors in which we have traditionally had a presence have always considered us a leading brand, but to stay that way all the players in each sector demand that our developments take account of the changes taking place in each field. We therefore have different product lines for each segment in accordance with its needs.

Bodyshop

This is the sector most often identified with SAGOLA, and in many ways the sector which sets the standard for all the others as far as paints and performance are concerned.

Apart from our list of annexes, for this sector we detail our star products in quality and sales volume.

Industrial Vehicle

This sector recognises in SAGOLA an established manufacturer of coating spray guns and equipment. The brand is closely associated with reliability, quality and convenience at work, contributing confidence to the commercial vehicle distribution network.

Industrial Supplies

This is a constantly developing sector in which SAGOLA has always been the reference, with special finishes equipment for pressure and special pumps for products specifically developed for this sector.

Dedicated to continuous improvement in **quality, service and management.**

Our business partners are aware that SAGOLA, as well as contributing a quality brand, provides them with a manufacturer who has won their loyalty by dint of constant effort over the years. This is something we strive for every day.

We are aware that our development and innovation will be our best allies along with the loyalty of our users in the future.

SAGOLA has always been export-oriented and has achieved a notable expansion

We have always had an export-oriented attitude. We are currently present in more than 80 countries and keep on growing to ensure that our brand, and the products it represents, reach the entire world with the invaluable help and support of our importers.

The **loyalty** of our users is one of our closest allies, in conjunction with **innovation**.

All **painting guides** are available on our website.

Approved Manufacturers

Our relationship with painting manufacturers around the world means that launching SAGOLA in a new market is easier for us.

Our homologations make the market more active because users know that the product they are buying has been tested and homologated by their paint brand.

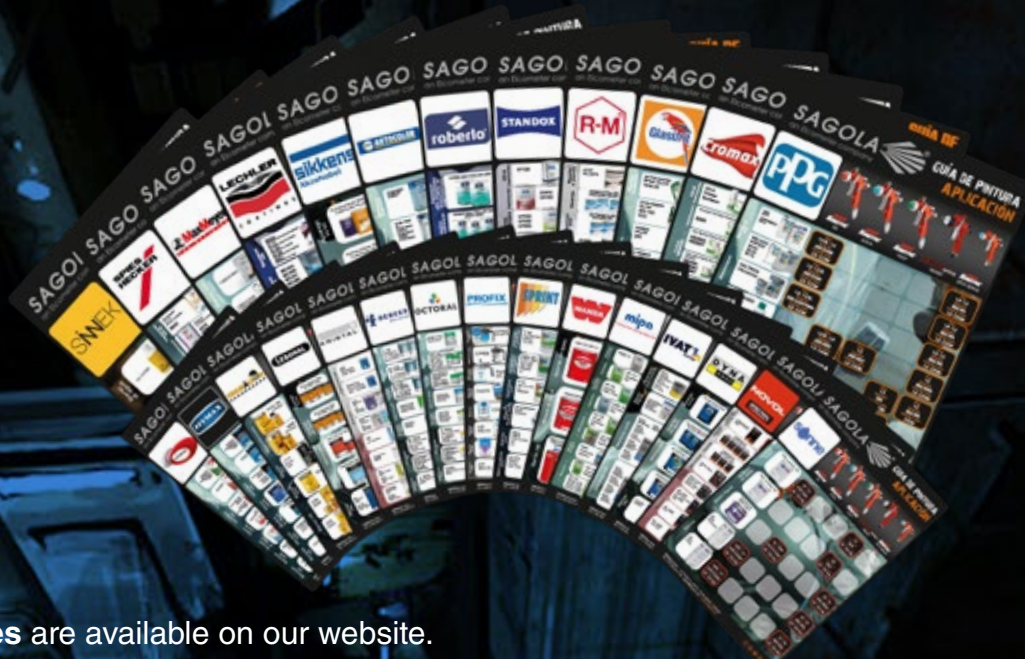

For many years, SAGOLA has devoted all its efforts not only on improving the quality of its products and service, but also to improve all aspects related with management, HR, environment, etc.

More than 60 industrial patents/models registered worldwide CEE / UK / ASIA/ USA:

- Manual Spray Guns
- Packing Nuts
- Air Caps
- Deposits
- Automatic Spray Guns
- Blow Guns
- Valves
- Keys, Accessories

As a reference it is worth noting that SAGOLA was one of the first companies in Spain to obtain ISO certification, which meant a new management model where improvisation was forgotten and gave way to a management organization fully controlled and automated.

In 2023, Sagola received Nadcap® accreditation for demonstrating their ongoing commitment to quality by satisfying customer requirements and industry specifications.

ACCREDITED

Chemical Processing

The commitment to the environment by SAGOLA has always been one of its main objectives. This is the reason why SAGOLA has been a pioneer in the manufacture of equipment for low-emission paint solvent to the atmosphere. We were pioneers in meeting environmental regulations as strict as the 1151 of the US California State SCAQMD.

On the other hand the commitment to uphold the highest standards of security makes the manufacture of our products to evolution continuously in its design and manufacturing process. Therefore our standard products meet CE, ATEX, IP54, etc.

SAGOLA is a company which spends significant resources in R&D and is always in constant evolution. As a result of this investigation and due to the need of protection of our own Know-how, SAGOLA is very active in all related with the intellectual property, being owner of a large number of patents worldwide.

Undoubtedly, SAGOLA is a recognized brand worldwide so in this aspect, the protection levels of our brand worldwide are very high.

SAGOLA has got registered its different brands (SAGOLA, DEFYNIK and DELON) practically worldwide.

SAGOLA ®
an Elcometer company

Our History

1955

SAGOLA foundation as a subcontracting company

1960

SAGOLA begins manufacturing spray guns. Launches the Sagola ALM 401

1966

Expansion of SAGOLA facilities

1973

Due to its growth, SAGOLA builds the new facilities

1980

Sagola is a leader in Spain, Arab countries and Latin America

1990

Sagola launches its low-emission solvent products on the market. One of the top three manufacturers worldwide

1999

Sagola launches the 4200 G spray gun

2007

Sagola launches its first interchangeable HVLP air nozzle

2010

Sagola exports to more than 80 countries

2016

Investment in the latest technology and automation of its manufacturing processes. Sagola launches the 4600 Xtreme spray gun

2020

Sagola is part of the Elcometer Group

2022

Sagola launches the new innovation of the 4100 range spray gun.

Airbrushing system

Airbrushing is the spraying system that offers the best quality finish. The combination of paint and compressed air minimizes the particle size, resulting in a fine and glossy finish.

It is the predominant system in industries such as automotive, industrial bodywork, or recreational boating, where the quality of the finish is the most important factor.

Sagola's experience in the design and manufacture of airbrushing equipment guarantees the highest application standards required by the latest generation of paints.

Sagola's airbrushing range covers all system variations:

- Manual gravity, suction, and pressure guns.
- Automatic guns.
- Low-pressure painting equipment:
 - Diaphragm pumps
 - Pressure pots

Sagola X 4100 SERIES

Weight: (X series pressure version)	525 grams	1.16 lbs
Weight: (Xtreme Ceramic version)	552 grams	1.22 lbs
Weight: (Xtreme PD version)	552 grams	1.22 lbs
Dimensions: (X series pressure version)	17.2 x 18.2 cm. (width of handle 1.9 cm.)	6.8 x 7.2 " (width of handle 0.75")
Dimensions: (Xtreme Ceramic version)	19 x 20 cm. (width of handle 1.9 cm.)	7.5 x 7.9 " (width of handle 0.75")
Dimensions: (Xtreme PD version)	19 x 20 cm. (width of handle 1.9 cm.)	7.5 x 7.9 " (width of handle 0.75")
Air inlet connection	BSP 1/4" Male	
Cup	Product input through pressure pot or pneumatic pump	
Product filter	60/100 mesh	
Recommended working pressure	X series: 2 - 3 bar (29 - 43.5 psi)	Xtreme CER/PD: 3 - 4 bar (43.5 - 58 psi)
Average sound pressure level	80 dB	
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, Stainless steel and Teflon	

Sagola X 4100 series pressure

Spraygun main news

01 Forged and anodized aluminum **BODY**. Great robustness, lightness and high corrosion protection. Register DC 3 300.029

02 NOZZLES AND NEEDLES made of stainless steel. High precision. High flow. Maximum application speed.

03 High durability **AUTOMATIC PRODUCT PACKING GLAND**. One single piece. Stainless steel body in quick-change format. Avoid manipulation and breakage of the glands and facilitates their disassembly for the integral cleaning of the paint area. Unique in the market. Patented system P073000321.5.

04 AIRCAPS. Made of high-strength and lightweight duralumin (corrosion-free). HVLP and EPA systems. Fully interchangeable. 4 choice of aircaps compatible with all available fluid nozzle sizes.

High Transfer HVLP Aircap. Designed under the highest environmental standards. Without pressure reducers in the body of the gun. We convert from a conventional system to an HVLP system, only changing the nozzle.

05 “SOFT FLOW” AIR VALVE. Smooth trigger even at high air pressure levels. No pressure drops between the 1st and 2nd stage of the trigger. Save paint by regulating air pressure with the trigger partially pulled (1st stage).

06 TRIGGER AND AXIS. 100% made of stainless steel. Relocated lever point for more comfortable tightening. Ultra-ergonomic design. Reduces fatigue.

07 AIR INLET REGULATOR. Modern design without sharp edges, it makes easier cleaning. Higher control precision. Ideal for quick adjustment.

08 NEEDLE GUIDE BOX. Reinforced in stainless steel. Very high resistance to mechanical abrasion.

09 PRODUCT REGULATOR. Sensitive adjustment of the amount of material to be applied.

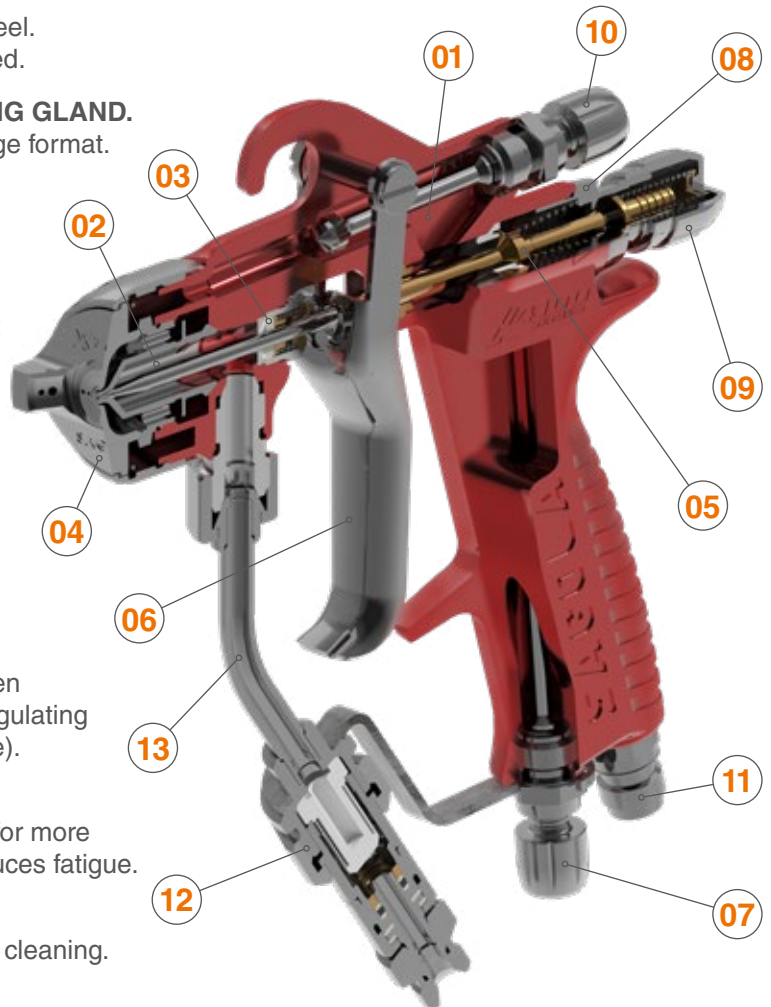

10 FAN REGULATOR. High precision progressive.

11 AIR INLET. 1/4" stainless steel.

12 FILTER HOLDER WITH SWIVEL COUPLING. Facilitates access to difficult areas and reduces fatigue in continued painting sessions.

13 PRODUCT TUBE for hose alignment. Made of stainless steel.

“METAL TO METAL” TECHNOLOGICAL VANGUARD. Very high mechanization technology. The only spraygun on the bodywork market manufactured without any type of gasket, neither inside nor outside, in the closures between the air and the paint. Minimize the number of spare parts.

X 4100 series aircaps technical data PRESSURE / Versions

XT03/3030 X series Aircap. Our HVLP aircap guarantees a reduction in spray mist which means an increase in transfer. Low pressure spraying provides perfect metal particle alignment.

HVLP PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Air consumption at 2 bar	Recommended pressure	Application distance	Code Spraygun
FINISHES. BASECOATS. DYES	1.00	XT03	460 L/min. (16.24 cfm)	0.5 - 1.0 bar (7 - 14.5 psi)	12 - 15 cm. (4.7 - 5.9")	10152406
GENERAL FINISHES PRIMERS	1.20	XT03	460 L/min. (16.24 cfm)	1.0 - 1.5 bar (14.5 - 22 psi)		10152407
PRIMERS AND BASECOATS	1.40	3030	514 L/min. (18.15 cfm)	2.0 - 2.5 bar (29 - 36 psi)		10152412

XT01 B/Super VIT X series Aircap. Versatility and perfect adaptation to any type of industrial painting project. High gloss finishes, primers and high viscosity paints. Its sustained air consumption, together with the high percentages of product transfer, make SAGOLA's EPA aircaps the most balanced system on the market.

EPA PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Air consumption at 2 bar	Recommended pressure	Application distance	Code Spraygun
METALLICS. CLEARCOATS	1.00	XT01 B	295 L/min. (10.42 cfm)	0.5 - 1.0 bar (7 - 14.5 psi)	18 - 20 cm. (7 - 7.9")	10152408
CLEARCOAT AND FILLERS	1.20	XT01 B	295 L/min. (10.42 cfm)	1.0 - 1.5 bar (14.5 - 22 psi)		10152409
PRIMERS AND FILLERS	1.40	XT01 B	295 L/min. (10.42 cfm)	2.0 - 2.5 bar (29 - 36 psi)		10152410
METALLICS. CLEARCOATS	1.20	Super VIT	380 L/min. (13.42 cfm)	1.0 - 1.5 bar (14.5 - 22 psi)		10152414
CLEARCOAT AND FILLERS	1.40	Super VIT	380 L/min. (13.42 cfm)	2.0 - 2.5 bar (29 - 36 psi)		10152416

777 / 765 X series Aircap. Speed and high energy of atomization. Large surface painting with an exceptional high gloss finish. Available to be combined with high size of nozzles in work with high viscosity products. Maximum speed. Maximum level of gloss.

MEDIUM PRESSURE PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Air consumption at 2 bar	Recommended pressure	Application distance	Code Spraygun
FINISHES. HIGH QUALITY	1.00	777	345 L/min. (12.18 cfm)	0.8 - 1.5 bar (11.6 - 22 psi)	18 - 20 cm. (7 - 7.9")	10152404
FINISHES. HIGH GLOSS	1.20	777	345 L/min. (12.18 cfm)	0.8 - 1.5 bar (11.6 - 22 psi)		10152405
FINISHES AND PRIMERS	1.20	765	315 L/min. (11.12 cfm)	0.5 - 1.0 bar (7 - 14.5 psi)		10152402
PRIMERS AND BASECOATS	1.40	765	315 L/min. (11.12 cfm)	1.0 - 1.5 bar (14.5 - 22 psi)		10152403
GLUES AND ADHESIVES	1.80	20A	430 L/min. (15.2 cfm)	1.0 - 1.5 bar (14.5 - 22 psi)		10152417

Both the **product contribution** and the **fan size** in the pressure guns are directly related to the product pressure set by the user, the product viscosity and the characteristics of the hose. Therefore, a reference value cannot be established.

Sagola 4100 Xtreme Ceramic / PD

Special applications

Sagola 4100 Xtreme Ceramic

A perfect fusion between speed and high transfer with quality finishes of XTREME aerographic systems.

Ideal for high microns jobs and and highly abrasive products.

In the ceramic applications, we provide the maximum resistance. And in vitroceramic, we can achieve the highest degree of refinement and finishing quality.

Recommended application	Recommended nozzle	Aircap	Air consumption at 2 bar	Recommended pressure	Application distance	Code Spraygun
FINISHES HIGH QUALITY	1.40	78	410 L/min. (16.24 cfm)	0.5 - 1.0 bar (7 - 14.5 psi)	18 - 20 cm. (7 - 7.9")	10152130
FINISHES HIGH TRANSFER PRIMERS	1.40	XT03	460 L/min. (16.42 cfm)	1,0 - 1,5 bar (14.5 - 22 psi)	12 - 15 cm. (4.7 - 5.9")	10152131
SPECIAL ABRASIVES PRODUCTS	1.80	67	400 L/min. (13.41 cfm)	2.0 - 2.5 bar (29 - 36 psi)	18 - 20 cm. (7 - 7.9")	10152132
PRIMERS AND FONDS. HIGH THICKNESS	2.20	64	390 L/min. (10.77 cfm)	2.0 - 2.5 bar (29 - 36 psi)	18 - 20 cm. (7 - 7.9")	10152133

Spraygun main news

01 DV NOZZLES. Made of stainless steel. Maximum application speed.

02 AIRCAPS Made of duralumin. Highly resistant and light. EPA and HVLP Systems. Totally interchangeable. 3 aircaps to choose. Each compatible with all available fluid nozzle sizes. High transfer HVLP aircap. Designed under the highest environmental standards. Without pressure reducers in the body of the gun We convert from a conventional system to an HVLP system, only changing the aircap. Two high transfer EPA aircaps.

03 “SOFT FLOW” AIR VALVE. Smooth trigger even at high air pressure levels. No pressure drops between the 1st and 2nd stage of the trigger. Save paint by regulating air pressure with the trigger partially pulled (1st stage).

04 IDENTIFYING RINGS OF COLOURS. Perfect for differentiation spray guns when there are multiple painters. (COLOR CODE)

05 ANODIZED FORGED ALUMINUM BODY High strength in just 347 grams.

06 One single piece AUTOMATIC PRODUCT PACKING GLAND. Made of stainless steel. It avoids manipulation and breakage of the glands and makes easier to remove it for a through cleaning of the paint part.

07 AIR INLET REGULATOR. Modern design without sharp edges, it makes easier cleaning. Higher regulation precision. Ideal for quick adjustment.

“METAL TO METAL” TECHNOLOGY. The high-end mechanisation technology used makes it the only spray gun in the bodywork market that is manufactured without any kind of gasket, interior or exterior, at the closures between the air and paint. Minimum number of spare parts.

IDENTIFYING RINGS OF COLOURS

AIR FLOW REGULATOR

The **RC1 pressure regulator** is the perfect ally for the Mini Xtreme spraygun. Hand tighten, no wrench needed. Perfect closing. It is not necessary to teflon the air inlet of the gun. (see page 68)

Mini Xtreme aircaps technical data / Versions

Mini HVLP Aircap. The use of the Mini HVLP aircap implies a drastic reduction in spray mist and a consequent increase in product transfer. The HVLP aircaps, which work at a lower spray pressure, facilitate the application of metallic colors, obtaining a better alignment of the metallic particle.

HVLP PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Air consumption at 2 bar	Recommended pressure	Application distance	Code Spraygun
SPECIAL ENAMELS	0.80	Mini HVLP	335 L/min. (11.83 cfm)	2.0 - 3.0 bar (29 - 43.5 psi)	12 - 15 cm. (4.72 - 5.9")	10111901
FINISHES. LOW MIST	1.00	Mini HVLP	335 L/min. (11.83 cfm)	2.0 - 3.0 bar (29 - 43.5 psi)		10111902
FINISHES AND PRIMERS. MAXIMUM SPEED	1.20	Mini HVLP	335 L/min. (11.83 cfm)	2.0 - 3.0 bar (29 - 43.5 psi)		10111903

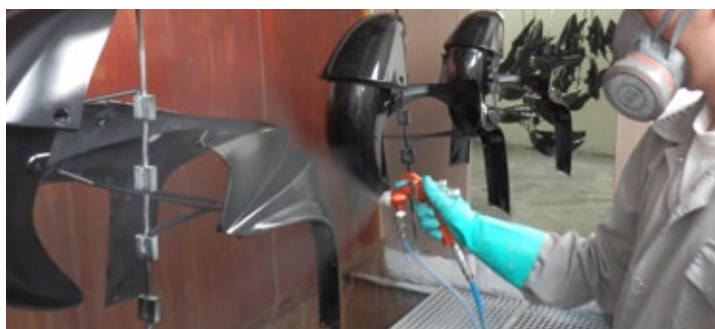

Mini EPA / Mini VIT Aircap. The EPA aircap of the Sagola Mini Xtreme pressure nozzles are characterized by their versatility and their adaptation to any type of industrial painting project. From high gloss finishes to primers and high viscosity paints. Their sustained air consumption, together with the high percentages of product transfer, make SAGOLA's EPA aircaps the most balanced system on the market.

EPA PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Air consumption at 2 bar	Recommended pressure	Application distance	Code Spraygun
SHADING. DYES, BASECOATS	0.80	Mini EPA	190 L/min. (6.71 cfm)	2.0 - 3.0 bar (29 - 43.5 psi)	18 - 20 cm. (7 - 7.9")	10111904

Both the **product contribution** and the **fan size** in the pressure guns are directly related to the product pressure set by the user, the product viscosity and the characteristics of the hose. Therefore, a reference value cannot be established.

Sagola 3300 GTO Pressure

Ideal for painting large
surfaces, machinery and
industrial vehicles
Continuous working days

Versatility. Industrial finishes

With the 3300 GTO pressure spraygun, SAGOLA offers a very high level product with an excellent quality / price ratio. This suction spraygun is characterized by its versatility.

High performance spraygun. High speed application for painting large surfaces. Offers large fan sizes.

Ideal for the application of enamels, varnishes, primers and basecoats.

High-end aluminum aircaps. Nozzles and needles made of stainless steel.

TECHNICAL DATA

3300 GTO PRESSURE

Weight	474 grams	1.04 lbs
Dimensions	17.8 x 17.5 cm. (width of handle 1.9 cm.)	7 x 6.9 " (width of handle 0.75")
Air inlet connection	BSP 1/4" Male	
Cup	Product input through pressure pot or pneumatic pump	
Recommended working pressure	2 - 3 bar (29 - 43.5 psi)	
Average sound pressure level	80 dB	
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, Stainless steel and Teflon	

Spraygun main news

01 SUPER LIGHT. -METAL TO METAL- TECHNOLOGY.

No sealing joints between components.

02 High strength FORGED ALUMINUM BODY.

REGISTER DC 924667-0004 DESIGN REGISTER.

03 ALUMINUM AIRCAPS. 3300 EPA / HVLP

Ultra-fine atomization and larger fans.

04 One single piece AUTOMATIC PAINT

PACKING GLAND. Unique in the market. It avoids manipulation and breakage of the glands and makes it easier to remove for the thorough cleaning of the paint area.

05 NOZZLE AND NEEDLE. Made of stainless steel.

06 SINGLE SHAFT SYSTEM. Directly continuing Xtreme model series with a simplified design, synchronized performance in any kind of situation, fewer parts, and maintenance reduction.

07 HIGH PRECISION AIR INLET REGULATOR. Modern design without sharp edges, it makes easier cleaning. Higher control precision. Ideal for quick adjustment.

08 AIR FLOW REGULATOR with PRESSURE GAUGE. It maintains the working pressure according to the parameters of Emissions regulations. (Green scale). Code 40000335

Introducción

Low pressure Pumps

High flow. High requirement. Simple handling and low air consumption with high performance.

Special versions

Besides the standard versions, we offer two special versions:

Double outlet version: Version with double product outlet for the use of two guns at the same time.

2K paint version: Version with two absorption probes to work with 2K products. (Mix ratio 1:1)

Special version
Double product outlet

Special version
2k Products

Different settings options

Choose the most suitable version for your jobs:

Chassis: Trolley or wall version

Absorption: Absorption hose or 5L gravity tank.

Any type of product

Suitable for waterborne or solvent based products... basecoat, transparent lacquers, primers, fillers,...

Any product with any viscosity or density. Special kit for abrasive products.

Air and product hose

8 x 15 mm. anti-static air hose and
6 x 8 mm. product hose with Nylon cover.
Light and resistant hose.

Version	Code
5 m. air + product hose + cover	56414039

15 m. air + product hose + cover	56414041
20 m. air + product hose + cover	56414042

Introduction

Sagola's range of **pneumatic double diaphragm pumps** is the best option for those bodywork industries with very demanding jobs.

Free flows of up to 40 L/min. Possibility of working with several guns at the same time.

Ideal for serial work sessions where production can not be stopped to refill a can or a pot.

Double diaphragm pump main news

14 WALL SUPPORT (OPTIONAL).

Sagola DM 1/400

Double membrane pneumatic equipment prepared for high productions. It has the capacity to use several pistols at the same time (double output version).

It offers easy handling and low air consumption with high performance. Minimum cost and maintenance.

With a flow rate of 40 L/min., it is designed to meet the needs of small metal, plastic, wood and industrial bodyshop industries at the highest level.

Valid for products such as lacquers and varnishes, basecoats, dyes, enamels, primers, fillers, glues,..., in general, medium viscosity products.

Pressure Pots

Sagola pressure pots come into their own when pumping equipment demands the maximum durability and minimum maintenance, even with the most abrasive paints (enamels, ceramic and vitro-ceramic clears, cast iron effect, pastes...) or corrosive products (dyes, waterborne paints...).

Suitable for any type of paint

Made of aluminum or stainless steel, Sagola's range of pressure pots is suitable for both waterborne and solvent basecoats, abrasive products, high-viscosity primers or fluid dyes. Check our range, there is an ideal configuration for your product.

Top outlet

Sagola's superior product outlet pressure pots minimize cleaning tasks. Avoid pouring paint into the pressure tank by using one of our interchangeable aluminum tanks or by directly inserting the paint bucket. Simply remove it after painting, and the pressure pot is almost clean.

Maintenance free

An adequate cleaning process is enough to maintain the Sagola pressure pot. There are no wear parts inside so focus on getting a good finish.

High-end features

Double high precision regulators, various mixer options: Manual, pneumatic rotary, pneumatic alternative; discharge valve, high quality materials,... Sagola pressure pots are designed and built following the highest quality standards.

Introduction

Sagola's range of **pressure pots** is the best option for large surface projects where a good balance between application speed, finish quality and easy cleaning is required.

Made of stainless steel or aluminum with high-precision regulators, several mixer options (manual, pneumatic...) and

superior product outlet; an extremely easy system to clean and maintain.

Versions in 2.5 and 10 liters of capacity. Increase your productivity and save time by not having to refill the gun deposit.

Pressure pots main news

01 TANK OR DEPOSIT made of Stainless Steel or Aluminum.
Very robust and easy to clean.

02 TANK LID made of Stainless Steel or Aluminum.
High quality sealing to prevent leaks.

03 PRODUCT OUTLET VALVE.
Ball valve to open or close the product outlet.

04 MANUAL PRODUCT MIXER.
Mixer for homogenization of the product.

05 AIR INLET.
Air inlet of 1/4" M.

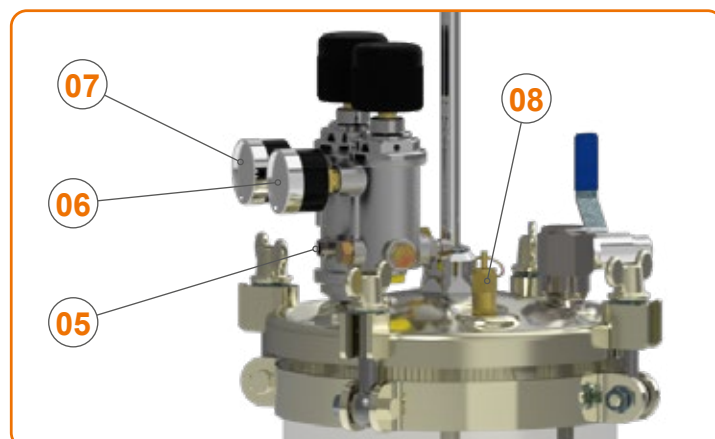

06 SPRAYGUN PRESSURE REGULATOR.
Precise control of gun pressure.

07 POT PRESSURE REGULATOR.
High quality gauge.

08 DISCHARGE VALVE. Pressure release valve.
tared at 4 bar (6110 Inox version) and at 7 bar (6110 Co version)

09 CLAMPS. Very robust clamps for closing the pot.

10 MIXER BLADES. Removables

Disposable deposits

Single-use disposable tanks for the 6110 Inox pressure pot.

Sagola 6110 Inox / 6110 Co

*Sagola
6110 Inox with
pneumatic
mixer*

The range of SAGOLA pressure pots is characterized by its simple handling and minimal maintenance to provide a great service to professional painting.

Maximum quality of finishes for industrial vehicles painting industries.

The 6110 Inox pressure pot is made of Stainless Steel, being a very robust product.

The tank capacity is 10 liters. Includes manual product mixer or pneumatic mixer. The product outlet is in the upper area of the pot.

Double, high precision, robust regulators with discharge valve.

Valid for waterborne and solvent-based paints. Ideal for Industrial Bodyshop and Nautical Sports.

Sagola 610 / Sagola 612

Sagola 610

SAGOLA pressure pot with a 10 liters deposit capacity.

Pot body made of steel and aluminum lid. It incorporates a top handle for holding and transporting.

Includes high-precision double regulation with robust pressure gauges. Pressure discharge valve. Top product output.

Pressure pot valid for the application of medium-low viscosity paints. Valid for solvent based products.

Sagola 612

Small size SAGOLA pressure pot with top handle for easy transport.

Pot body and lid made of aluminum.

Includes pressure regulator with gauge. Pressure discharge valve. Top product output.

Tank capacity is 2.5 liters.

Pressure pot valid for the application of medium-low viscosity paints. Valid for solvent based products.

Manufactured in stainless steel.

Lower product outlet.

It incorporates side grip handles, wheels and a folding double handlebar for easy transport.

Includes high precision regulation with robust manometer.
Pressure discharge valve.

Application of goteles and pastes.

 Gravity Sprayguns

Sagola X 4100 series gravity

X 4100 SERIES

The Legend of Industrial finishing

Ergonomics

Displacement of the center of gravity thanks to the aluminum construction of the aircaps.

Lighter forged aluminum body. Fatigue reduction in series works.

Swivel filter holder in the pressure version.

Hardness

Lower maintenance costs = more productivity thanks to our 'metal to metal' technology: No gaskets or plastic parts in the product area.

TECHNICAL DATA

X 4100 SERIES GRAVITY

Weight without cup	496 grams	1.1 lbs
Weight with cup	722.6 grams	1.39 lbs
Dimensions without cup	17.2 x 17.3 cm. (width of handle 1.9 cm.)	6.78 x 6.83 " (width of handle 0.75")

Sagola X 4100 series gravity

Spraygun main news

01 Forged and anodized aluminum **BODY**. Great robustness, lightness and high corrosion protection. Register DC 3 300.029

02 NOZZLES AND NEEDLES made of stainless steel. High precision. High flow. Maximum application speed.

03 High durability **AUTOMATIC PRODUCT PACKING GLAND**. One single piece. Stainless steel body in quick-change format. Avoid manipulation and breakage of the glands and facilitates their disassembly for the integral cleaning of the paint area. Unique in the market. Patented system P073000321.5.

04 AIRCAPS. Made of high-strength and lightweight duralumin (corrosion-free). HVLP and EPA systems. Fully interchangeable. 4 choice of aircaps compatible with all available fluid nozzle sizes.

High Transfer HVLP Aircap. Designed under the highest environmental standards. Without pressure reducers in the body of the gun.

05 "SOFT FLOW" AIR VALVE. Smooth trigger even at high air pressure levels. No pressure drops between the 1st and 2nd stage of the trigger. Save paint by regulating air pressure with the trigger partially pulled (1st stage).

06 TRIGGER AND AXIS. 100% made of stainless steel. Relocated lever point for more comfortable tightening. Ultra-ergonomic design. Reduces fatigue.

07 AIR INLET REGULATOR. Modern design without sharp edges, it makes easier cleaning. Higher control precision. Ideal for quick adjustment.

08 NEEDLE GUIDE BOX. Reinforced in stainless steel. Very high resistance to mechanical abrasion.

09 PRODUCT REGULATOR. Sensitive adjustment of the amount of material to be applied.

10 FAN REGULATOR. High precision progressive.

11 AIR INLET. 1/4" stainless steel.

12 CUP. High capacity, 650 ml. with anti-drip system.

"METAL TO METAL" TECHNOLOGICAL VANGUARD. Very high mechanization technology. The only spraygun on the bodywork market manufactured without any type of gasket, neither inside nor outside, in the closures between the air and the paint. Minimize the number of spare parts.

X 4100 series aircaps technical data GRAVITY / Versions

XT01 X series Aircap. Versatility and perfect adaptation to any type of industrial painting project. High gloss finishes, primers and high viscosity paints. Its sustained air consumption, together with the high percentages of product transfer, make SAGOLA's EPA aircaps the most balanced system on the market.

EPA PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Product output flow	Fan size	Application distance	Code Spraygun
FINISHES, BASECOATS	1.30	XT01	171 g/min. (6.03 oz/min.)	250 mm. (9.84")	18 - 20 cm. (7 - 7.9")	10142004
GENERAL FINISHES, CLEARCOATS, SINGLE STAGE	1.40	XT01	175 g/min. (6.17 oz/min.)	255 mm. (10.04")		10142005
PRIMERS	1.60	XT01	209 g/min. (7.37 oz/min.)	285 mm. (11.2")		10142006

Air consumption at 2 bar (29 psi): 235 L/min. (8.30 cfm)

Recommended pressure:
1.8 - 2.2 bar (26 - 32 psi)

96 X series Aircap. The 96 aircap is a legend in industrial finishing. Its high application speed and atomization quality stand out. It is the reference finishing aircap for our most representative suction spraygun.

Maximum speed. Maximum level of brightness.

MEDIUM PRESSURE PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Product output flow	Fan size	Application distance	Code Spraygun
FINISHES, BASECOATS	1.30	96	177 g/min. (6.24 oz/min.)	260 mm. (10.24")	18 - 20 cm. (7 - 7.9")	10142012
GENERAL FINISHES, CLEARCOATS, SINGLE STAGE	1.40	96	178 g/min. (6.28 oz/min.)	270 mm. (10.6")		10142001
PRIMERS AND FILLERS	1.60	96	216 g/min. (7.62 oz/min.)	310 mm. (12.2")		10142002
FILLERS	1.80	96	293 g/min. (10.34 oz/min.)	380 mm. (15")		10142003

Air consumption at 2 bar (29 psi): 250 L/min. (8.83 cfm)

Recommended pressure:
1.8 - 2.2 bar (26 - 32 psi)

Sagola X 4100 series gravity

X 4100 series aircaps technical data GRAVITY / Versions

XT03 series Aircap. Our HVLP aircap guarantees a reduction in spray mist which means an increase in transfer. Low pressure spraying provides perfect metal particle alignment.

HVLP PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Product output flow	Fan size	Application distance	Code Spraygun
HIGH QUALITY FINISHES	1.30	XT03	139 g/min. (4.9 oz/min.)	260 mm. (10.24")	12 - 15 cm. (4.72 - 5.9")	10142007
GENERAL FINISHES	1.40	XT03	143 g/min. (5.04 oz/min.)	270 mm. (10.6")		10142008
PRIMERS. HIGH SPEED	1.60	XT03	165 g/min. (5.82 oz/min.)	310 mm. (12.2")		10142009
FILLERS	1.80	XT03	202 g/min. (7.13 oz/min.)	380 mm. (15")		10142010

Air consumption at 2 bar (29 psi): 465 L/min. (16.42 cfm)

Recommended pressure:
1.8 - 2.0 bar (26 - 29 psi)

64S X series Aircap. Speed and high energy of atomization. Large surface painting with an exceptional high gloss finish. Available to be combined with high size of nozzles in work with high viscosity products. Maximum speed. Maximum level of gloss.

MEDIUM PRESSURE PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Product output flow	Fan size	Application distance	Code Spraygun
GUN FILLER. HIGH VISCOSITY	2.20	64S	290 g/min. (10.23 oz/min.)	280 mm. (11.02")	18 - 20 cm. (7 - 7.9")	10142011

Air consumption at 2 bar (29 psi): 305 L/min. (10.77 cfm)

Recommended pressure:
2.0 - 2.5 bar (29 - 36 psi)

Sagola Mini Xtreme gravity

Spot Repair

All of our Xtreme identity in 365 grams: metal-to-metal technology, aircaps made of duralumin, forged and anodized body...

Ideal for parts painting

The little beast

The best tool for quick everyday repairs.
Adjusted fan size to save product on painting small parts.

Fans of 30 cm. with an air consumption of 190 L/min. Suitable to work with 2 HP compressors.

Sagola Mini Xtreme gravity

Spraygun main news

01 NOZZLES. Made of stainless steel.
Maximum application speed.

02 AIRCAPS. Made of duralumin. Highly resistant and light.
EPA and **HVLP** Systems. Totally interchangeable. 4 aircaps to choose. Each compatible with all available fluid nozzle sizes.
High transfer **HVLP** aircap. Designed under the highest environmental standards. Without pressure reducers in the body of the gun We convert from a conventional system to an HVLP system, only changing the aircap. Two high transfer **EPA** aircaps.

03 "SOFT FLOW" AIR VALVE.
Smooth trigger even at high air pressure levels.
No pressure drops between the 1st and 2nd stage of the trigger. Save paint by regulating air pressure with the trigger partially pulled (1st stage).

04 PRODUCT REGULATOR with FLOATING RING. For precise regulation of product flow.

05 IDENTIFYING RINGS OF COLOURS. (COLOR CODE).
Perfect for differentiation of spray guns when there are multiple painters.

06 ANODIZED FORGED ALUMINUM BODY
High strength in just 365 grams

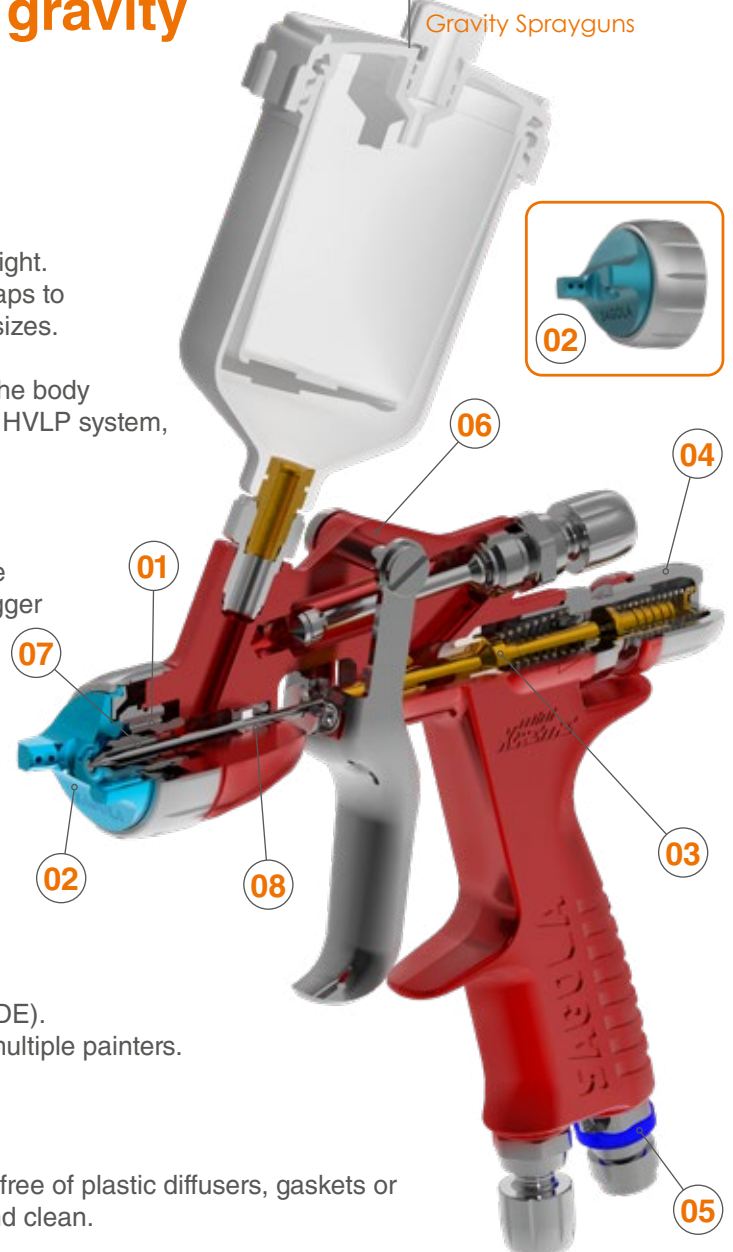

07 "METAL TO METAL" TECHNOLOGY. Product zone free of plastic diffusers, gaskets or inserts in the fluid nozzle. Extremely easy to maintain and clean.

08 One single piece AUTOMATIC PRODUCT PACKING GLAND.
Made of stainless steel. It avoids manipulation and breakage of the glands and makes easier to remove it for a through cleaning of the paint part.

09 AIR FLOW REGULATOR with GAUGE.
The RC1 pressure regulator is the perfect ally for the Non-digital version. Hand tighten, no wrench needed. Perfect closing. Without Teflon coating the air inlet of the gun.

10 SPECIAL MINI TECH JET ROUND AIRCAP.
Convert your Mini Xtreme to an airbrush.
Specially designed for low-viscosity products, lettering and small retouches.

11 CUP OPTIONS. (See page106)
- 125 ml. white cup
- 125 ml. black cup for UV products
- 500 ml. white cup
- 650 ml. white cup

Approved for use by leading paint brands.

Sagola 3300 GTO gravity

From dye to adhesives or gun putties.
There's nothing better than the 3300 GTO
spraygun. Wide variety of aircaps and fluid
nozzles from 1.2 mm.
up to 2.8 mm.

Finishes: 1.3 - 1.4 mm.

Primers: 1.6 - 1.8 mm.

Gun putties: 2.0 - 2.8 mm.

Unreachable technologies
for many..., incorporated in
our 3300 GTO range of guns.

Versatility

HVLP and EPA high transfer Aircaps made of duralumin.
Forged aluminum body with 'soft touch' satin finish.
No joints or plastic inserts in the product area. One-piece
self-adjusting packing gland. Ergonomic trigger
made of stainless steel.

Sagola 475 XTech

The SAGOLA 475 XTech spraygun that due to its reduced dimension becomes ideal for shadings, little retouches and/or painting of small parts.

Injected aluminum body, very light. Manufactured with Sagola high technology to provide a very high quality of atomization.

This model incorporates the high quality gravity cup with a 125 ml capacity. Includes paint filter.

Available with three aircaps. Variety of nozzles to give great precision to the retouching and painting of parts.

The **Sagola 475 XTech**, designed for **precision solutions** in the small details and retouching of bodyshop parts.

05 AIRCAP

High quality spray at feathering and retouches.

Nozzle available: 0.50 / 0.80

10 AIRCAP

Quick and versatile. Special for metallics and clearcoats.

Nozzle available: 1.00

R5 AIRCAP

Maximum precision at the tiniest feathering. Definition and regulation. Similar to an airbrush.

Nozzle available: 0.50

Very light injected-aluminium body

Injected-aluminium body. A highly manageable spraygun with reduced dimensions and low weight.

High quality of spray

High transfer and low air consumption.

Bigger cups

Option to adapt the 500 ml. and 650 ml. cups to the gun through the adapter coupling. Code 55711513

Air flow regulator

Incorporates air flow regulator, high quality and precision.

Code 56418417

Sagola Classic Pro XD gravity

The Sagola Classic Pro XD Primer Gun incorporates EPA and HVLP high transfer air caps.

“Metal to metal” technology. No joints or plastic parts in the product area.

Nozzle and needle made of stainless steel.

Matt chrome-plated injected aluminum body.

Maximum ergonomics and comfort.

High transfer in finishes and primers

Sagola X 4100 series suction

The SAGOLA X 4100 series is the specific spraygun for the industrial painting sector. The incorporation of new technological aspects makes it the perfect tool for highly demanding jobs in terms of quality of finish, robustness and ergonomics.

Prepared for continuous working days and painting of large surfaces.

Ergonomics

Displacement of the center of gravity thanks to the aluminum construction of the aircaps.

Lighter forged aluminum body. Fatigue reduction in series works.

Hardness

Lower maintenance costs = more productivity thanks to our 'metal to metal' technology: No gaskets or plastic parts in the product area.

Forged and anodized aluminum body of great robustness and high protection against corrosion.

Large deposit capacity, with double watertight paint closure system and flange closure with gasket and anti-drip lid. The sprung weight reduces fatigue compared to higher deposits.

Speed

Sagola DVR suction technology to achieve unbeatable application speeds.

Product savings

Sagola EPA high transfer aircaps. Perfect balance between finishing quality and product savings.

96 X series Aircap. The 96 aircap is a legend in industrial finishing. Its high application speed and atomization quality stand out. It is the reference finishing aircap for our most representative suction spraygun.

Maximum speed. Maximum level of gloss.

Sagola 3300 GTO suction

Ideal for painting large
 surfaces, machinery
 and industrial vehicles

Continuous
 working days

Versatility. Industrial finishes

With the 3300 GTO suction spraygun, SAGOLA offers a very high level product with an excellent quality / price ratio. This suction spraygun is characterized by its versatility.

High performance spraygun. High speed application for painting large surfaces. Offers large fan sizes.

Ideal for the application of enamels, varnishes, primers and basecoats.

High-end aluminum aircaps. Nozzles and needles made of stainless steel.

Remote Fan Adjustment

QCR VERSION

Quick Change Manifold
Remote Fan Adjustment

Reduction of size

We try to reduce its dimensions as much as possible, thus improving manageability and consequently accessibility to painting pieces with complex surfaces.

Robot version (DMR/QCR)

Automated fan size regulation. An air inlet replaces the manual regulator wheel.

Abrasives version

Tungsten Carbide nozzles and needles to spray abrasive fluids. Great hardness and resistance to abrasion.

Version with base

Same features as the standard version (DMM/DMR) but including a base that simplifies maintenance and cleaning tasks. Quick disassembly system.

Sagola V 4000

V 4000 spraygun main news

01 SUPER LIGHT. -METAL TO METAL- TECHNOLOGY.

Absence of gaskets, O-rings or plastic parts in the fluid area.

02 ANODIZED ALUMINUM BODY

Great robustness. High protection against corrosion.

03 ANODIZED ALUMINUM AIRCAPS

(corrosion free). Great resistance and durability. Suitable for aggressive environments.

04 AUTOMATIC PRODUCT PACKING GLAND

in one piece. High durability.

05 All **CONNECTIONS**, both hydraulic and pneumatic on the same side of the gun.

06 High durability **OPERATING PISTON** designed and tested for carrying out continuous jobs.

07 **SINGLE SHAFT SYSTEM**. Directly continuing Xtreme model series with a simplified design, synchronized performance in any kind of situation, fewer parts, and maintenance reduction.

08 **FLUID FLOW REGULATOR**. Great adjusting sensitivity. With vernier set to "0".

09 High precision progressive **FAN REGULATOR**.

10 **QUICK CONNECTORS** on the air and fluid inlets.

Application of all types of paints and sprayable products

- dyes
- metallized
- enamels
- primers
- coles
- adhesives

- textured,...

100% compatibility V 4000 vs. X 4100 Aircaps, nozzles and needles

The V 4000 automatic spray gun is 100% compatible with the range of fluid nozzles and air caps of the X 4100 series, allowing to replicate the finishes of the automatic painting line with a manual spray gun and vice versa; giving the possibility of combining both systems (manual and automatic) in the same project.

Robot Version (QCR/DMR)

Automated fan size regulation. The manual regulation wheel is replaced by an air inlet.

Available in both standard version (DMR) and base version (QCR).

Base Version (QCM/QCR)

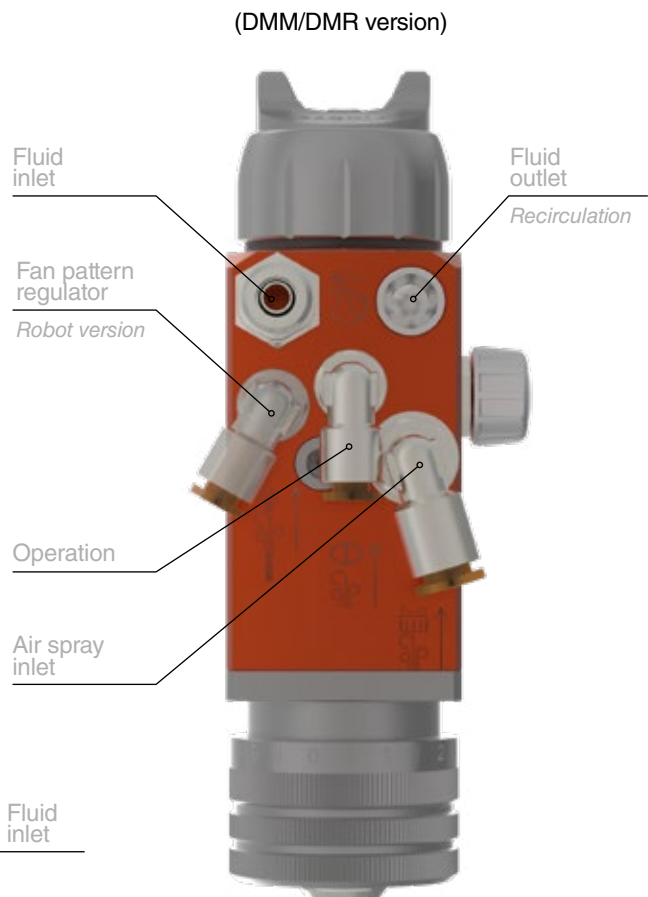

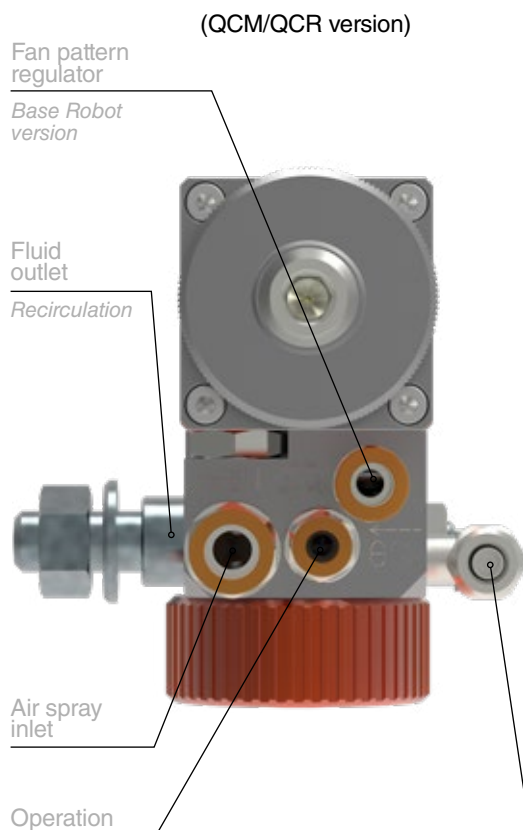

- Large ergonomic knob to ensure a quick and easy fixing of the gun to the base.
- Hold system with positioning fit.
- Fan regulator located in the base for a quick replacement of the gun keeping the setup parameters.
- Manufactured in accordance with the normative EN 1953:2013 Ap. 5.2.4.

Connections

All inlets, both hydraulic and pneumatic, have been located on the same side of the gun or the base to facilitate the

setup of the painting line.

Sagola Mini V

Mini V, automatic spraygun of small dimensions and high precision. Ideal for painting small parts and machinery with reduced spaces.

Prepared for spraying solvent-based and water-based products.

Mini Xtreme top quality spray system. It is characterized by having very few maintenance parts, which makes it a very reliable piece of equipment that will not stop your production line.

Regulation system that will allow us to achieve the best finishes and the best performance in any type of application and with any type of product.

HVLP and EPA aircaps. High transfer.

Materials in contact with the product	Stainless steel, anodized aluminum, graphited Teflon, Nylon and nickel-plated brass	

Serie V (corrosives) / Sagola V2 PD

Serie V (corrosives)

Sagola's range of automatic spray guns for difficult products.

Stainless steel fluid nozzles to apply corrosive products.

Wide range of aircaps: Conventional, EPA and HVLP to cover all the needs of the industry. High level of finishes with a contained spray mist.

Special for jobs that require a high rate of opening and closing cycles. Suitable for use in any automatic painting line.

Sagola V2 PD

Very high product transfer spray gun. Special for road marking painting machinery.

Internal mix aircap. 6 mm. nozzle.

Valid for high viscosity products.

Dimensions: 17.2 x 5.3 x 7.2 cm. (6.8 x 2.1 x 2.8 ")

Air consumption: 147 L/min.

Code
10259203

Spraygun Accessories

Code
56418020

Air Flow regulator with pressure gauge RC1

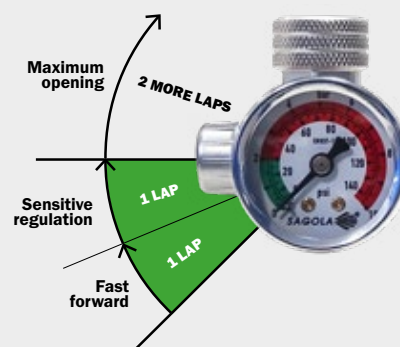

Forged aluminum body with exterior and interior anticorrosive treatment.

High precision pressure gauge. scale in bar and psi. Optimal work zone marking (green zone).

Hand-tight fitting. Easy and comfortable placement without the need for tools with anti-wear treatment.

Regulation knob, due to its internal design, this allows us a quick adjustment in one turn from 0 to 1.5 bar and a precision adjustment in another turn from 1.5 to 2 bar, giving us an ultra-precise adjustment capacity.

Equipment free of O-rings. This eliminates maintenance due to wear, breakage or chemical attack.

High precision flow regulator

High precision air-flow regulator kit. Solvent-proof gaskets. Suitable for 4600 Xtreme digital. Recommended for finishing spray guns.

Code
56418519

Air Flow regulator with pressure gauge RC2

Pressure gauge flow regulator. Exact input pressure gun. High quality gauge green scale for high transfer guns.

Code
40000335

4600 HVLP Tester

Pressure tester for HVLP aircaps of the 4600 Xtreme spraygun.

Code
10010051

Ultra Soft-Flow Valve

The new "ULTRA SOFT FLOW" is a servo-piloted air valve, patented and exclusive to SAGOLA, which reduces the fatigue produced by pulling the trigger by up to 65%. An unprecedented ergonomic innovation that represents a substantial improvement in the working conditions of the industrial painter.

PATENT - 202230704

Ultra Soft Flow Valve • Mini Xtreme	56418697

Spraygun Accessories

Pressurizer kit

for gravity spray guns.
Gravity cup pressure kit
for high viscosity materials
spraying.
Non-return valve included.

Code
56418513

Magnetic supports SP2 and SP1

Magnetic mounts for 1 (SP1) or 2 (SP2) guns. Solvent resistant
paint. Valid for PPS type adapters. Maximum robustness. High
fixing power thanks to its two powerful magnets.

Version	Code
SP 1	40000245
SP 2	40000246

Cleaning kit

Complete cleaning set, including
one brush for outside cleaning, and
rods of different sizes for all the inner
paths of the spray gun. Supplied in a
practical show case.

Code
40000086

Lubricant grease

Natural grease, specially made for
spray guns and painting equipments
moving parts lubrication. High
consistency, even under extreme
temperatures. Long lasting, it doesn't
lose properties over the time.

Code
56418589

Ford 4 Viscosimeter

Immersion cup, made of
polyamide (resistant to
solvents) with metallic outlet
hole (brass).

Code

The **aircap model** is vital to achieve the desired results. The type of product we are going to apply and the application system we are going to use must both be taken into account when selecting an aircap. We will obtain the desired spray by correctly combining the aircap with the correct nozzle and needle kit, and a proper air supply.

High Transfer Aircaps

Accessories for pumps and pots

At Sagola we have a complete range of accessories for jobs with Sagola low-pressure painting equipment. Deposits, hoses, filters, regulators and accessories to ensure maximum performance.

Anti-pulsation filter

60 and 100 mesh filters for DM double membrane pumps.

Code	Description
56413507	DM 1/300 Antipulsation Filter Kit
83660053	DM 1/400 Antipulsation Filter Kit
83660030	Antipulsation filter 60 mesh
83660029	Antipulsation filter 100 mesh

Product regulator

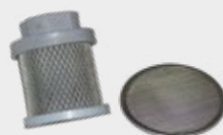

Low pressure product regulator for DM double membrane pumps.

Code	Description
52410019	DM pumps product regulator

Absorption probe

for DM pumps.

Code	Description
86465206	Absorption probe
83660047	Narrow pass absorption filter
56418055	Round filter 40 microns

Other accessories

for DM pumps.

Code	Description
49000478	DM 1/300 Membrane kit
30090017	DM 1/400 Membrane kit
49000479	Distribution group gasket kit DM 1/300
30090018	Distribution group gasket kit DM 1/400
30090019	DM 1/400 Pneumatic distributor kit
30090020	DM 1/400 Product valve kit

Gravity deposit

5 L. capacity for DM pumps.

Code	Description
30090091	5L Gravity deposit

Interchangeable tanks

Interchangeable tanks for easy cleaning of the pots.

Code	Description
52411607	10 L Interchangeable tank - 6110 INOX
52411608	25 L Interchangeable tank - 652 INOX
52411609	50 L Interchangeable tank - 653 INOX

Air and product hose

Antistatic air hose 8 x 15 mm. and product hose 6 x 8 mm. with Nylon cover. Light and resistant hose. (Description page 141)

Code	Description
56414130	1.8 m. Air hose + product hose + cover
56414039	5 m. Air hose + product hose + cover
56414044	7.5 m. Air hose + product hose + cover
56414040	10 m. Air hose + product hose + cover
56414041	15 m. Air hose + product hose + cover
56414042	20 m. Air hose + product hose + cover

Disposable tanks

Single-use disposable tanks for the 6110 Inox pressure pot.

Code	Description	Units
52411616	Disposable tanks - 6110 INOX	10

2

Mixed system

The mixed painting system combines the speed of airless spraying with the high quality finish of the airbrush system.

Sagola offers an exclusive product for professional use with a high level of demand both in terms of performance and image.

Mack, Raider and bellows lines (HTV and HT). A decided commitment to technique and durability aimed at guaranteeing exceptional performance in the harshest conditions of use.

Sagola Mini Xtreme mix

Applications:

Varnishes, lacquers, enamels, basecoats, solvent-based or water-soluble products, 1k and 2k finishes, solvent-based or waterborne basecoats, and polyurethanes.

The excellence of industrial finishing

Designed to last over time thanks to its robustness and the quality of its components. To this we add its manageability, smoothness and small size that make it the ideal mixed gun for difficult jobs and the smallest in dimensions on the market.

TECHNICAL DATA

MINI XTREME MIX

Weight	510 grams	1.1 lbs
Weight (with swivel coupling)	550 grams	1.98 lbs
Dimensions (with swivel coupling)	17.3 x 20.1 cm.	6.8 x 7.9 "
Handle Width	1.8 cm.	0.71 "
Air inlet connection	Quick coupling 8 mm. / M16	
Product input connection	BSP 1/4" M (with or without swivel coupling)	
Deposit	Product inlet through pressure pot or pneumatic pump	
product filter	60/100 mesh	
Recommended working pressure	2 bar (29 psi)	
average sound pressure level	80 dB	
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, INOX, Teflon and Nylon	

Sagola Mini Xtreme mix

Spraygun main news

01 BODY in forged and anodized aluminium, highly resistant and light. High corrosion protection.

02 NEEDLE made of stainless steel. High resistance.

03 High durability **AUTOMATIC PRODUCT PACKING GLAND.**

One piece. Stainless steel body in quick change format. It avoids manipulation and breakage of the glands and makes it easier to remove for thorough cleaning of the paint area. Unique in the market. Patented system P073000321.5.

04 MIXED TIP with body made of stainless steel. Highly resistant and light (corrosion free).

05 NOZZLE AND NEEDLE CLOSURES.

Manufactured in Tungsten Carbide. High durability. Disassembly of the needle without the need for tools.

06 TRIGGER. 100% made of stainless steel. Smooth action with an ultra-ergonomic design. Reduces fatigue.

07 SWIVEL FILTER HOLDER.

Facilitates access to difficult areas and reduces fatigue during continuous painting sessions.

08 PRODUCT TUBE for hose alignment. Made of stainless steel

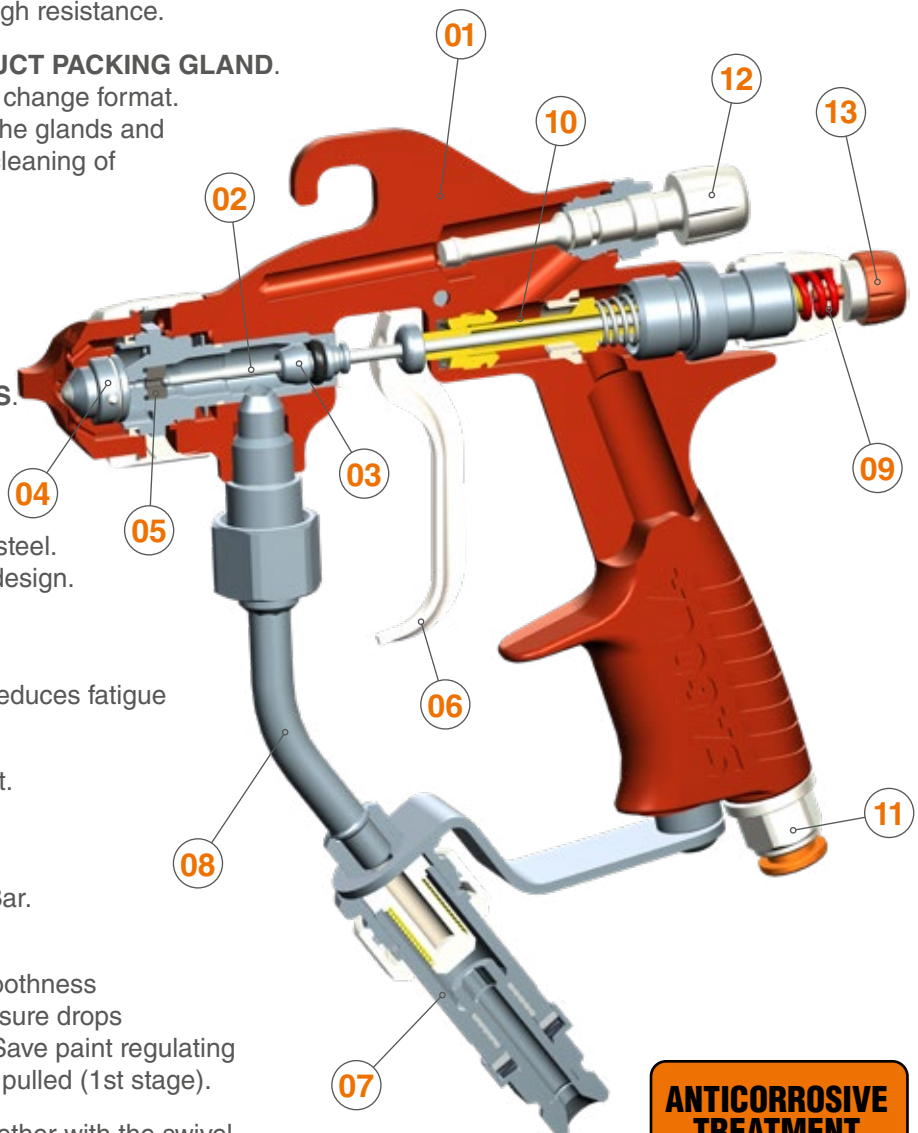

09 MAXIMUM PRESSURE 200 BAR.

With **YELLOW** spring, pressure of 120 Bar.
With **RED** spring, pressure of 120 Bar.

10 "SOFT FLOW" air valve. Trigger smoothness even at high air pressure levels. No pressure drops between the 1st and 2nd trigger stage. Save paint regulating the air pressure with the trigger partially pulled (1st stage).

11 SWIVEL QUICK CONNECTOR. Together with the swivel product connector, it offers the Mini XTREME Mix total freedom of movement.

12 High precision **FAN REGULATOR.** We get total control of the fan size.

**ANTICORROSIVE
TREATMENT
OUTSIDE AND
INSIDE**

13 SECURITY SYSTEM.
Easy gun lock system.

Sagola Mini Xtreme mix

A perfect fusion between speed and high transfer levels (over 80%) with the finishing quality of the XTREME airbrush systems.

Total control in fan regulation. Maximum precision.

The Mini Xtreme Mix gun is the result of a great design work, achieving one of the smallest and most ergonomic guns on

the market. Ideal for painting parts with complex shapes.

Ideal for applications with Varnishes, lacquers, enamels, basecoats, solvent-based or water-soluble products, 1k and 2k finishes, solvent-based or waterborne basecoats, and polyurethanes. Ideal for the furniture, industry and industrial bodyshop sectors.

Body

Forged and anodized aluminum body of high resistance and great durability. Extremely robust elements.

High resistance

Elements made of Tungsten Carbide, such as the nozzle and needle closures. Anti-corrosion treatment throughout the gun.

Trigger

Made of stainless steel. Soft action trigger thanks to the "Soft flow" air valve.

Swivel filter holder

Greater smoothness and ease of turning with high pressures. High reliability. Great resistance. Avoid twisting the hose.

Mini Xtreme Mix gun
with swivel filter holder

Mini Xtreme Mix gun
without swivel filter holder

Automatic Sagola V7 mix

Gun with mixed painting system. High product pressure (30 - 150 bar). High production and low contamination. Product closure in Tungsten Carbide.

High speed of application.

For jobs that require a high rate of opening and closing cycles. Optimal to install in robots and special machines.

Valid for jobs where it is necessary to reduce mist and improve working conditions. To achieve a drastic reduction in material consumption.

Spraying of lacquers, varnishes, ultraviolet paints, etc.

Body

Forged and anodized aluminum body of high resistance and great durability. Extremely robust elements.

High resistance

Elements made of Tungsten Carbide, such as the nozzle and needle closures. Anti-corrosion treatment throughout the gun.

Product savings

Reduction of mist and material consumption while maintaining a level of finish of the highest level thanks to the design of its air nozzle.

Advantages

Product inlet filter, adjustable air inlet couplings, double fan regulator, cleaning and maintenance accessories.

Maximum production

This line, exclusively designed and manufactured for professional use, gathers high standards both in term of performance and image..

Within the quality standards we focus on simplicity and durability.

Thus, we have redesigned completely the hydraulics. Now it contributes to a long-lasting life even in the worst working conditions and without waiving on its performance.

Mixed pneumatic equipment

Main news mixed equipment

01 PNEUMATIC BODY made of aluminum. Machined and anodized. High resistance to corrosion.

02 AIR DISTRIBUTION AREA
To avoid freezing problems and maintain a smooth functionation without any loss of performance.

03 PNEUMATIC AREA SHAFT.
Rectified and chromed shafts.

04 PRODUCT AREA SHAFTS.
Hardened and chrome-plated shafts.
Great durability and wearing resistance.

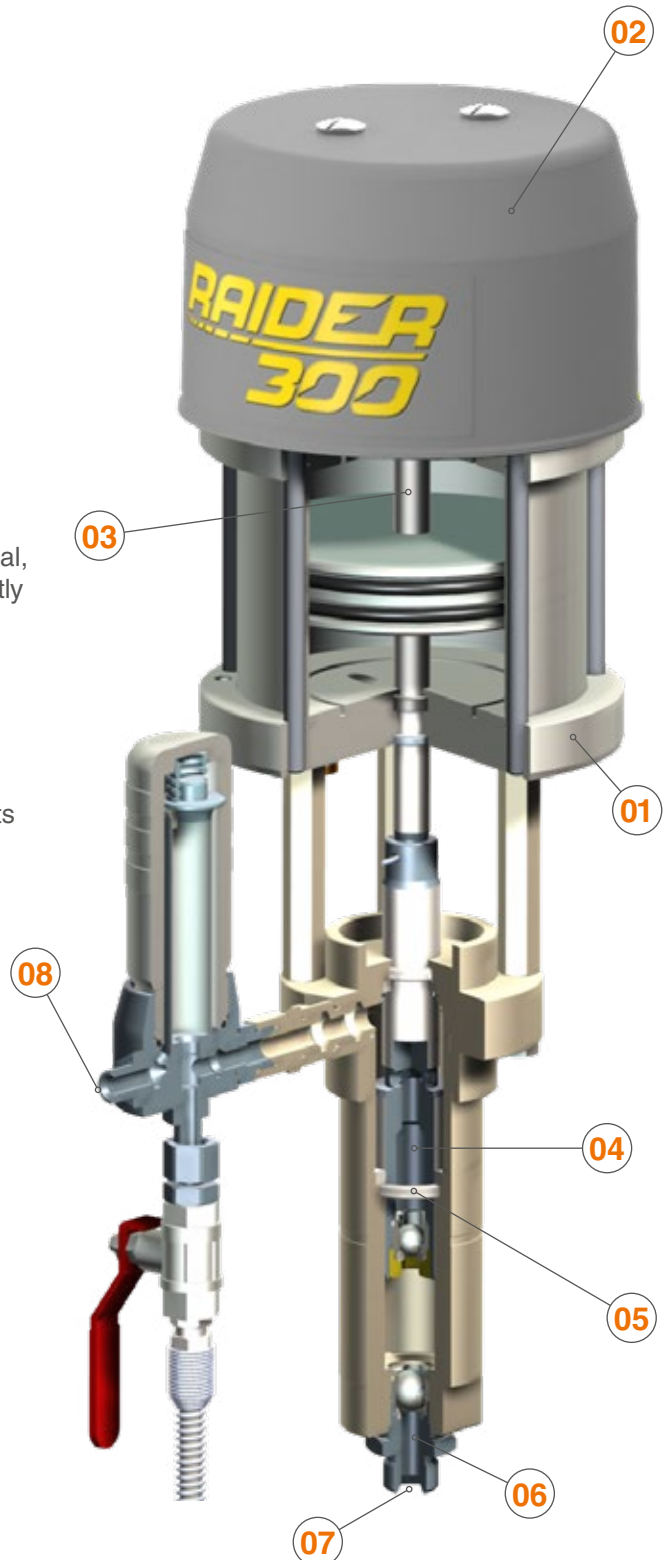

05 ALL PACKINGS have been REDESIGNED.
They offer great durability and smooth-functioning, even working at low pressure.

06 VALVES.
Oversized valve design. They give us a better flow of material, a reduction in speed of passage of product and consequently less wear.

07 PRODUCT INPUT.

08 PRODUCT OUTLET.

09 COMPACT DESIGN.
Robust and high quality. A simplified design, with fewer parts and easier maintenance and repair.

Sagola RAIDER 300 Mix X

Professional pneumatic equipment for painting with a mixed painting system. High production.

RAIDER professional line, designed and manufactured with the needs of small and medium metal and wood industries in mind.

Easy to use and low maintenance. High robustness. A bet for the technique and the durability. Very low air consumption.

Valid for lacquers and varnishes, basecoats, enamels, waterborne paints, light primers,..., in general, medium viscosity products.

Introduction. Bellows Equipment

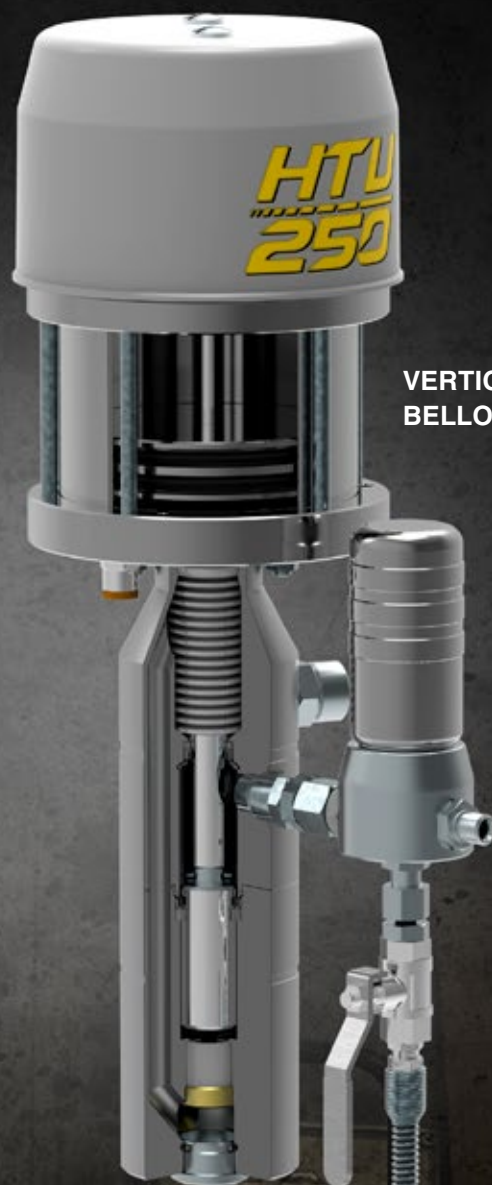

Sagola bellows equipment

Sagola is a specialist in the design and manufacture of pneumatic bellows pumps. A unique system that multiplies the resistance of the equipment and reduces maintenance costs.

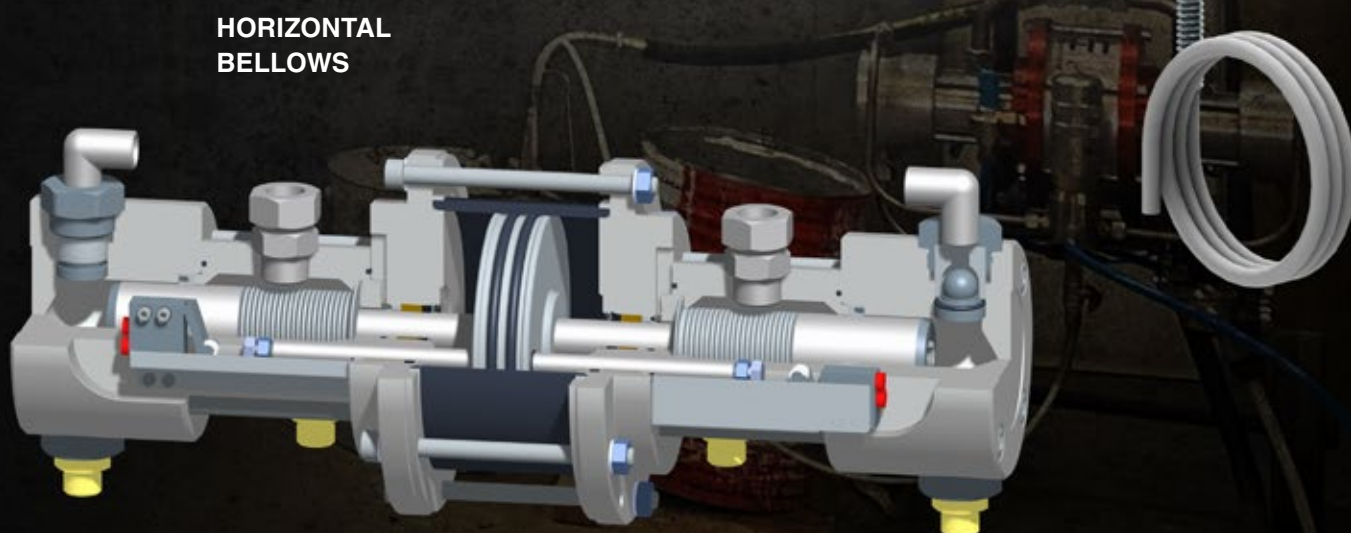

Fluid flow rates close to 10L/min.
Great contribution of product to
Less cycles = Less wear = Less maintenance costs.

A firm commitment to technique and durability aimed at
guaranteeing exceptional performance in the harshest
conditions of use.

The best option for the application of complex products with
high reactivity, fast drying (UV), thixotropic, etc...

VERTICAL
BELLOWS

HORIZONTAL
BELLOWS

Sagola HTV 250 X (vertical bellows)

The Sagola HTV 250 X incorporates a vertical bellows system that provides exceptional life in the harshest conditions of use. Specially designed for working with "difficult" products, it completely eliminates packing gland leaks, multiplying the life of conventional equipment by 5.

It requires no lubrication in the shaft area. Oversized valves for less wear. Oversized air distributor to avoid freezing.

Maximum protection for complex products:

- High reactivity
- Thixotropic
- Quick drying (UV)
- Waterborne products

REGULATIONS:

2006/42/CE
ATEX (Ex) II 2G, IIB T3 x
UNE-EN ISO 80079-36:20,
UNE-EN ISO 12100:2012, EN12621,

5 m. air and product hose assembly with Nylon cover. Light and resistant hose.

Sagola HT 10/15/25 X (horizontal bellows)

The horizontal double bellows offers flow levels unattainable by conventional piston systems. Ideal for feeding several guns at the same time, automatic painting lines, continuous painting industries...

Continuous production Total tightness. Ideal for UV products, polyesters or polyurethanes.

Minimum wear. Greater product contribution with less number of cycles. Higher durability compared to the traditional packing system.

0.35 cfm (9.75 L/min) free flow.

More flow at less pressure.

56414037*	11 m. air hose 6 x 8 mm. + product hose

* Version for gun with quick connection

3

Airless System

High pressure systems that do not use air to spray paint.

The “airless” system is ideal for applying high microns and painting large surfaces, reaching exceptional levels of product transfer.

Ships, cisterns, tanks, interior-exterior treatments, modular furniture, large metallic constructions...

In short, large painting projects or application of highly viscous paints, anti-corrosion treatments, etc... Projects in which application speed and product savings are the most important factors.

Sagola PSAM 500

Applications:

Varnishes, lacquers, enamels, basecoats, products with solvents or water-solubles, 1k and 2k finishes, solvent-based or waterborne products, and polyurethanes.

Designed for painting at high pressures that uses the Airless spray system (without air)

Advantages of the Airless system: speed, high micronage and minimum mist.

Able to withstand pressures up to 500 bar.

Resistance and robustness

TECHNICAL DATA

PSAM 500

Weight: (with nozzle)	549 grams	1.21 lbs
Dimensions: (with nozzle)	16.5 x 21.7 cm.	6.5 x 8.5 "
Handle Width	2.5 cm.	1 "
Product input connection	BSP 1/4" M Swivel	
Deposit	Product input by Airless pump	
Product filter	White (50 mesh); Yellow (100 mesh); Red (200 mesh)	
Maximun working pressure	500 bar (7,252 psi)	
Operating temperature range	0 - 60°C	32 - 140°F
Materials in contact with the product	Stainless steel, Nylon, Aluminum, Viton, Tungsten Carbide and Copper	

Sagola PSAM 500

High pressure airless spray gun for professional use. Its airless spray system provides transfer levels and application speed unattainable for other paint systems.

Great resistance and robustness, but without neglecting ergonomics, it incorporates a trigger made of stainless steel with a large clamping surface that provides comfort and manageability to be used in continuous production sessions.

Both the seats and the closures are made of Tungsten Carbide and the fluid passages are given an anticorrosive treatment.

The swivel connector located at the product inlet is a great help for accessing areas of great difficulty.

The wide availability of spray tips made of tungsten carbide makes it recommendable for the application of all kinds of sprayable products of low, medium and high viscosity.

Availability 3 types of product filters with different meshes (50, 100 and 200 mesh) to select from the viscosity of the product to be applied.

REGULATIONS:

2006/42/CE,
EN 1953:2013
2014/34/CE, ATEX  II 2G x
UNE-EN ISO 80079-36:2017

Spraygun main news

01 BODY in forged and anodized aluminium, highly resistant and light. High corrosion protection.

02 CLOSURES AND SEATS manufactured in Tungsten Carbide.

03 TRIGGER. 100% made of stainless steel. Four fingers for greater comfort of use and reduced fatigue.

04 PRODUCT INLET Product inlet swivel coupling for better ergonomics.

05 PRODUCT FILTER.
Variety of filters available

AND INTERIOR**

**VERSIONS / ACCESSORIES**

Description		Code
PSAM 500 Airless Gun*		30170108
(*) Does not include swivel head and nozzle		
Head adapter coupling kit 11/16 F - 7/8 M (included)	Accessory	49000353

Body

Forged and anodized aluminum body of high resistance and great durability. extremely robust elements.

High resistance

Elements made of Tungsten Carbide, such as the nozzle closure and the needle seat. Anti-corrosion treatment throughout the gun.

Trigger

Made of stainless steel.

Swivel coupling

Greater smoothness and ease of turning with high pressures. High reliability. Great resistance. Avoid twisting the hose.

Sagola PSAM 104

The Sagola PSAM 104 high pressure airless gun recommended for electric and pneumatic airless painting equipment that does not exceeding a working pressure of 250 bar.

It is recommended for all types of medium viscosity products.

Both seats and closures are manufactured in Tungsten carbide.

Includes 1/4" M swivel coupling and filter holder.

**Body**

Forged and anodized aluminum body. Great durability of the elements. Prepared for painting lines with recirculation system.

Connections

1/4" BSPT male product inlet. Air connection (pilot): quick connector to 8 mm. tube.

Anchoring system

Support kit included on shaft up to 12 mm. in diameter. Body on UNF - 1/2" x 20 threaded hole.

Tip Holder

Fixed (included) for the use of fixed nozzles/tips (see tips on page 105). Rotating head ref. 81461101 (page 106) not included with gun for use with rotating nozzles/tips (see page 104).

Sagola RAIDER 300 X

High production pneumatic equipment with an airless painting system. RAIDER professional range from Sagola.

This range has been designed and manufactured with the premise of being an exclusive product for professional use with a high level of demand both in terms of performance and image.

Within this section of quality we are committed to technique and durability. This leads us to a complete redesign of the hydraulic zone.

This provides exceptional life in the harshest conditions of use without compromising its performance, which offers a long life with minimal maintenance even when using more problematic materials.

10 m. Product hose with double metal reinforcement and 1/4" terminals. Robust and resistant.

Sagola ATLANTA 200 PLUS

The best option for medium production industries and decoration projects. Ideal for effortlessly applying high quality paints while maintaining a very high transfer rate.

Single-phase motor of 1 H.P. to reach 160 bar (2,321 psi) of maximum fluid pressure. Ease of operation. Easy cleaning thanks to the incorporation of a recirculation probe.

Electric membrane pump with 5 liter deposit. Application of lacquers, primers, enamels and varnishes. In general, medium viscosity products.

Sagola ATLANTA 800 / 800G

Powerful and robust industrial equipment for high production sectors. Construction, wood, metal or exterior painting projects where a compressed air line is not accessible.

2.7 H.P. single-phase motor that reaches 220 bar (3,191 psi) of maximum fluid pressure and a large flow rate of up to 9 L/min. that allow its continued use with one or two guns. Ease of operation. Easy cleaning thanks to the incorporation of a recirculation probe.

Large rear wheels, and swivel front wheels to facilitate movement on construction sites.

Electric membrane pump with absorption probe that, optionally, can be equipped with a 25 L deposit. Versatile equipment for the application of primers, enamels and plastics, waterproofing and intumescent. Includes special anti-vibration system.

REGULATIONS:

2006/42/CE
Low voltage 73/23/CEE,
Electromagnetic compatibility 89/336/CEE,
UNE-EN 292 (1 & 2), UNE-EN 989, UNE-EN
1050, CEI-34, VDE-0530/72

**ATLANTA 800****TECHNICAL DATA**

Weight (standard)	72 Kilograms	159 lbs
Dimensions (standard)	110 x 75 x 90 cm.	43.3 x 29.5 x 35.4 "
Electric motor	Single-phase. Switch with thermal protector	
Power supply - Frequency	220 V - 50 Hz	
Engine power	2,000 w (2.7 H.P.)	
Engine consumption	14.5 A	
Working pressure	0 - 220 bar	0 - 3,191 psi
Free flow (water viscosity)	7.5 L/min.	0.26 cfm
Product outlet	1/4" BSP Male	
Maximum nozzle	0.032 "	with 2 guns 0.026 "

VERSIONS**ATLANTA 800**

Description	Code
Trolley version and absorption probe	30940901
Full ATLANTA 800 painting equipment version. Includes PSAM 500 airless gun and 10 m. (32.8 ft) product dispersion hose	30940999

Petrol version

with a Honda 4-stroke engine with a power of 5.5 H.P.

VERSIONS**ATLANTA 800G**

Description	Code
Trolley version and absorption probe	30941001

PSAM 500 airless spray gun special for medium-high viscosity products. Seats and closures in Tungsten Carbide

10 m. Product dispersion hose with Polyester reinforcement and 1/4" swivel connector terminals. Robust and resistant.

Airless gun accessories

Product Transfer

At Sagola we have a wide range of solutions for the transfer of oils, chemical products, kerosene, biodiesel, antifreeze...

We offer integral solutions for your installation, from individual pumping systems to complete installations for the distribution of all types of fluids.

Sagola DM 400 pump

The DM 400 double diaphragm pneumatic pump is specially designed for transferring a wide variety of fluids, mainly medium and low viscosity products.

With a flow rate of 40 L/min. It is capable of handling a wide variety of fluids with solvency: solvents, glues, adhesives, lacquers, paints, dyes, oils...

Good abrasion resistance, chemical and heat resistance. High workload. Membranes made of polypropylene.

Suitable for use in a wide variety of industries such as oil, metallurgical, mining, coatings, wood, printing, water treatment, automotive, etc...

**REGULATIONS:**

2006/42/CE
ATEX  2 II GX
UNE-EN-13463-1:2011,
UNE-EN ISO 12100:2012,
EN 809, EN12621, EN12162
and EN 1127-1

TB 270 X pump

Piston transfer pump. Robust structure to ensure high performance. Great performance with little air consumption. High workload.

Solvents, glues and adhesives, lacquers, paints, dyes, oils, dirty oils, mineral or synthetic oils as well as for antifreeze fluid. In general, low and medium viscosity products.

The Sagola TB 270 X Pump is a pneumatic piston pump for quick assembly in drums and tanks or wall installation.

Lid elevator

Sagola presents the piloted pneumatic elevator whose purpose is to lift the lids of 200-liter drums that it sells, and to facilitate the change of drum.

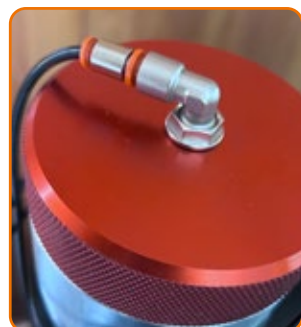

Having a pneumatic means greatly facilitates the work of lifting the lid together with all the possible accessories (pumps, mixers...), which together can reach a considerable weight.

Carrying out the work manually can create risks and difficulties that are eliminated by using this elevator.

It consists of a single-acting pneumatic cylinder, and is controlled by a manually operated pneumatic valve.

Body and support made of highly robust steel. High quality of components. With a floor support using M12 bolts for great stability and fixity.

This equipment is intended for professional use only.

Air filtering systems

New challenges in painting (new water-based paints), an increase in the number of tools in the industry and more demanding production, a high reliability in the compressed air network is becoming more and more important.

The appearance of regulations related to the drastic reduction of solvents in new paints makes the existence of impurities in the air network increasingly critical for the final results in a good finish.

With the sole objective of achieving the highest degree of finish, finish and shine, at SAGOLA we have worked to the maximum on our line of filters.

Air filtering systems

It is necessary to remove the impurities from the compressed air by means of a filter, bearing in mind that the maximum performance must be obtained for the painting job.

SAGOLA FILTERING SYSTEMS guarantee maximum air quality and minimum pressure loss of line.

The air from a compressor which is circulating throughout the line contains particles and solid impurities, water from the relative humidity of the suctioned air and burnt oil from the compressor.

That's why it is necessary to eliminate these impurities with the help of a filter but taking into account that we always have to obtain the maximum performance with the minimum pressure loss.

SAGOLA filtering systems guarantee maximum air quality.

With the recent emergence of the new regulations concerning the drastic decrease of solvents in the new primers, basecoats, HS clearcoats and even in the waterborne paints,

the existence of impurities in the compressed air which is used to spray is now more critical for the final results of the bodywork, mainly due to:

- In HS: the high gloss of these paints, their poor proportion of solvents and their decrease in the number of finishing coats make that the small particles proceeding from the compressed air become striking.
- In waterborne paints: their high incompatibility with any oil and organic fumes makes the air quality requirements very high.

Keys for the correct selection of the filter

The type and condition of the installed compressor and the quality of the air it is supplying must be taken into account for the election of a filtration system to install.

For example, If greater air purity is required a model **5200X Coalescent Purifier Regulator** should be installed -with which the following will be eliminated water and solid particles larger than 0.01 microns, water aerosols ($C > 0.01 \text{ mg/m}^3$) and oil aerosols ($C > 0.01 \text{ mg/m}^3$)- or a **Purifier regulator with Coalescent Filter plus Active Charcoal model 5300X** -used when it is necessary to eliminate oil, hydrocarbons or water in vapour form, organic fumes are present, foul air, solid particles larger than 0.01 microns and residual oil: maximum 0.003 p.p.m.-.

5000X range filters

Air filters designed and developed for the new technologies of automobile painting. Ideal for waterborne and HS paints.

Maximum air quality

The quality of compressed air is becoming more important every day in production processes. Contaminated air causes damage and manufacturing costs in many cases.

Not only is it important to have good quality compressed air where it may come into contact with the product, it is therefore essential to carry out a quality analysis of the compressed air.

Obtaining a good quality of compressed air is essential for a correct operation of the machines and to achieve an optimal final finish in the production processes.

Minimum pressure loss within the line

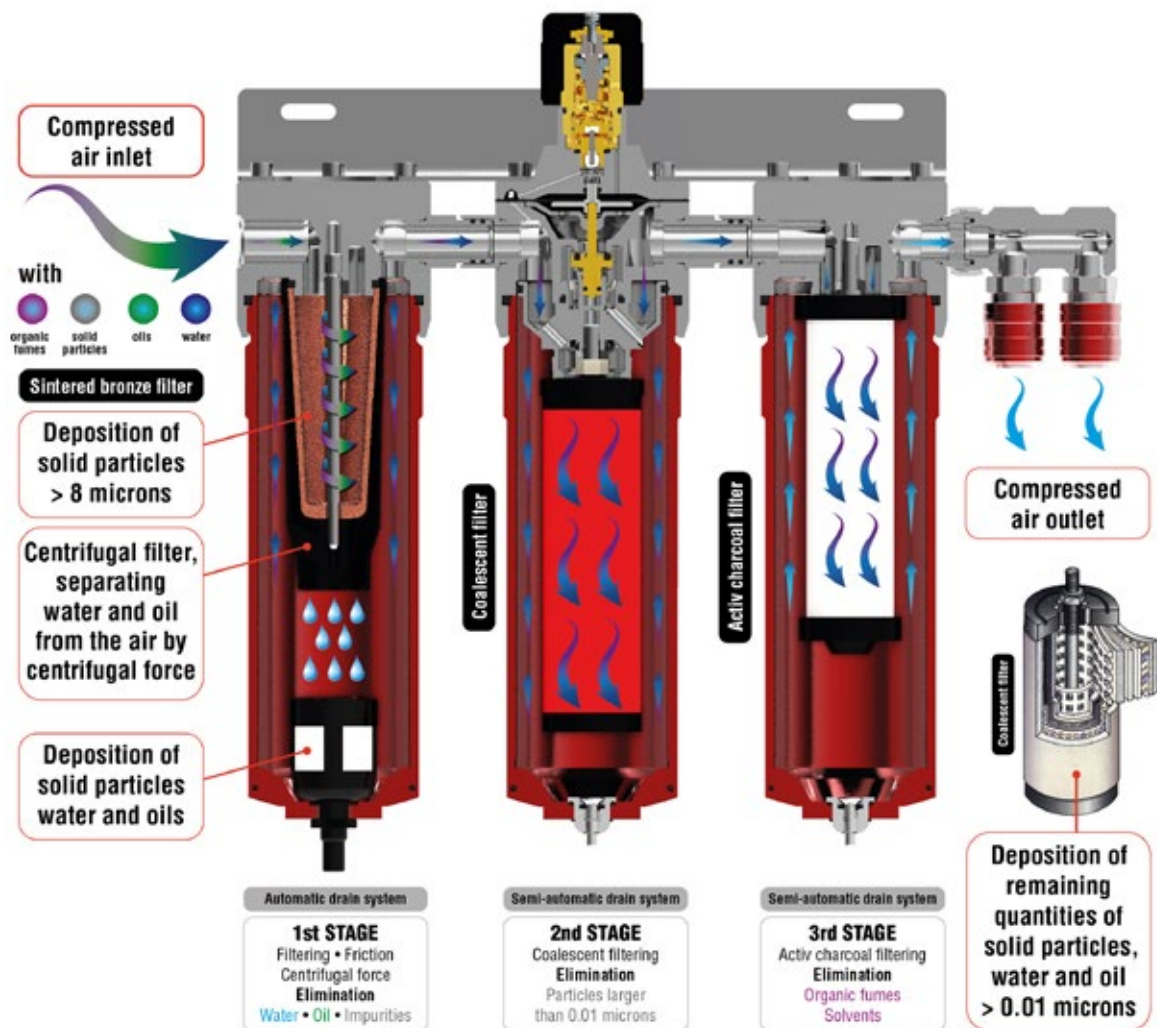

For these reasons it is necessary to eliminate impurities by means of a filter, taking into account that the maximum

performance with the minimum pressure loss must be obtained.

Ventajas principales

- Air-assisted regulator.
- Rapid discharge; instant pressure reduction.
- Aluminium body. CNC machined for toughness.
- Unmanned discharge of liquids and impurities.
- Maximum flow 3,000 L/min., outlets for 2 guns.
- 8 μ filter + Deflector of high capacity of solid and liquids retention.
- 1/2" inch air inlet.
- Filter life control. We incorporate dynamic element of life control.

Complete 5000X Series Filtration System

5000X range filters

5300X Filter

Sagola 5300X filter offers the maximum filtration level in spray booths and painting lines where finishing is highly demanding.

Three filtered stages. Sinterised brass 8 microns pre filtration is incorporated, followed by a 0.01 micron Coalescent filter and final filtration by a wide surface active charcoal filter.

Ideal for waterborne painting lines (and organic vapor problems in the network).

This model eliminates, in addition to water and impurities, organic fumes and foul air.

Versatile modular system

If you need to upgrade your system from a standard filter to a coalescing system or upgrade to activated carbon, with the Sagola 5000X modular system you can easily upgrade with a conversion kit.

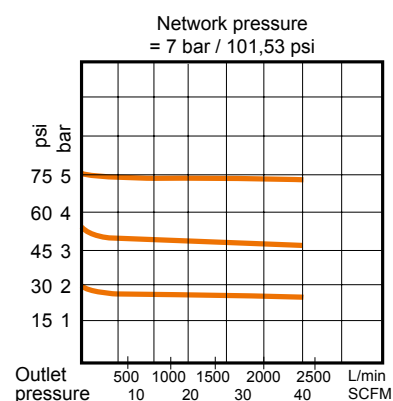

Made to last with minimal maintenance

Manufactured from machined aluminum with stainless steel couplings, the Sagola 5000X range of filters are incredibly durable.

Options

From pre-filters for moisture separation to coalescing filters to remove particles down to 0.01 microns or active carbon filters for breathing air.

The Sagola 5000X range is available in a number of models to meet the demands of any bodywork.

5000X range filters

5300X Plus Filter

Filter with the same technical and mechanical features as the 5300X model. Prepared for independent use of activated carbon filtering.

Double coalescing filter outlet for painting or blowing. Simple Active Carbon filter outlet for breathing or painted equipment.

Three filtered stages. Sinterised brass 8 microns pre filtration is incorporated, followed by a 0.01 micron Coalescent filter and final filtration by a wide surface active charcoal filter.

Filter life controller

Offer a helpful visual reminder of maintenance programs of our filters. The timer is included in each filter kit.

Timer of **3 months**: Active charcoal filter

Timer of **6 months**: Sinterised brass and Coalescent filter.

The filters have a limited useful life in your filtration equipment. When filters become clogged, equipment performance can decrease. Therefore, we have no guarantee of 100% correct filtering.

When you start using the filter you must press the "ON" button on the device.

5000X range filters

5200X Filter

The 5200X model offers the highest technology for air filtering. Two stages of filtering.

Incorporates an 8 micron sinterised brass filter followed by a final 0.01 micron coalescent filter.

Automatic drain system and assisted regulator wheel.

Highly resistant and protective vessels. its draining system reduces maintenance costs due to its greater durability.

It carries out double filtration with optimum flow and pressure regulation, retention of water and impurities achieving an air purity of 99%.

5000X range filters

5100X Filter

Air purifying filter with pressure regulator and pressure gauge.

Its vessel is tougher and more protective.

5100X filter comes with a new draining system which reduces maintenance costs due to its greater durability.

The filtering system retains water and impurities. Incorporates 8 micron sinterised filter.

5050X Filter

The 5050X model is an Purifier Filter with automatic drain system. Ideal for pre-filtering in industrial air lines. Incorporates 8 micron sinterised filter.

Line pre-filter for: medium compressor output (1/2" air inlet), mains level changes, booth input,...

5000X Filter

Purifier Filter with regulator, with a perfect price/quality ratio. Ideal for solvent basecoat paint booths and preparation areas.

The 5000X model features a semi-automatic drain system and dual air outlets.

Filtering system that retains water, oil and other impurities. Incorporates a 20 micron filter.

5000X range filters accessories

If you need to upgrade your system from a standard filter to a coalescing system or upgrade to activated carbon, with the Sagola 5000X modular system you can easily upgrade with a conversion pack.

Coalescent filter coupling

Coupling to convert a 5100X to a 5200X filter.

The definitive solution to problems with solid particles. It incorporates a wide surface coalescent filter. Increase of efficiency up to 0.01 microns. Semi-automatic drain system (+ the automatic drain system of 5100X).

Code
56418521

Active charcoal filter coupling

Coupling to convert a 5200X to a 5300X filter.

The best solution to problems of contaminating particles and organic fumes in the air network. It incorporates a wide surface active charcoal cartridge. Semi-automatic drain system (+ 2 drains coming with 5200X).

Code
56418520

Air quality test equipment

Equipment for the detection of air impurities, humidity level and temperature. It incorporates air quality test equipment with inlet regulator, flashlight with magnifying glass of 30 magnification for visualization of impurities, humidity meter and digital temperature.

It incorporates membrane filter kit, pore 0.45µ (50 units).

Code	Description
15020001	Air quality test Sagola case
49000740	Membrane filter kit. Pore 0.45 µ 50 units.

Pack 6000X Air Heater

The increase in drying times is usually one of the main stumbling blocks in the industry when considering the transition from solvent-based products to water-based products.

The use of the Pack 6000X to temper the compressed air can mean savings of up to 40% in the drying time of water-based paints.

The viscosity of the paint is inversely proportional to the ambient temperature. The warmer the environment, the lower the viscosity of the paint. Therefore, the use of tempered compressed air reduces the viscosity of the paint, making it easier to obtain a high-quality finish, especially in varnishes. More shine and less orange peel.

The differences in temperature between the different elements that are part of the painting process (the piece to be painted, the compressed air, the gun, etc...) can generate condensation in the environment. Compressed air that is too cold coming out of our gun can cause the hotter air in the cabin to condense when it comes into contact with it. A gun that is too cold can generate water condensation inside it.

Quality filtering

Effective solution for filtering
compressed air in professional
paint booths

The **Sagola 4000 air filtration** system is the effective solution for filtering compressed air in professional paint booths for: car repainting, wood, machinery, plastics and industry in general.

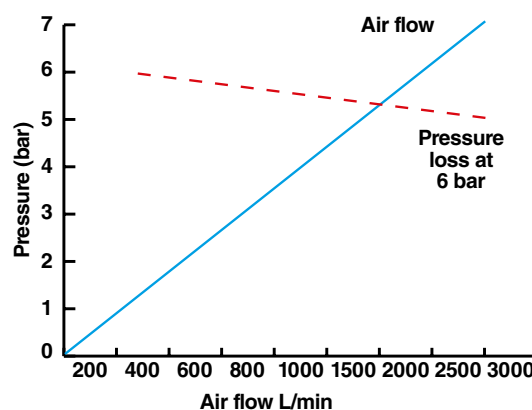

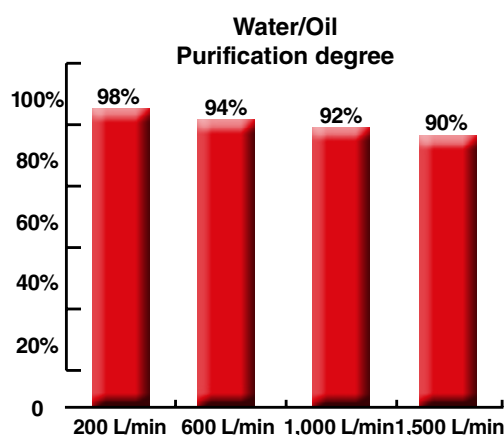

In order to choose the filter system we shall install in our shop, we must take into account the type of air compressor we have, its condition and the quality of the air it is supplying.

In case we are looking for a high quality filtration of particles, water and oil, for painting in a booth and to get a good finish, the filter 4120 would be suitable for primers, lacquers, clearcoats and enamels.

To get the highest performance and finishing quality with waterborne paints and High Solid (HS) products, we may need even more pure air that contains no particles at all.

In that case we have to install a coalescent filter and regulator, that is, the 4220. With this filter system we will eliminate any solid particle down to 0.01 microns, water aerosols ($C > 0.01 \text{ mg/m}^3$) and oil aerosols ($C > 0.01 \text{ mg/m}^3$).

Air filters designed and developed for new car painting technologies. Ideal for waterborne and HS paints.

4000 range filters

Maximum air quality

Professional line of air filters and regulators that offers maximum filtration, good performance and resistance, with the best price/quality ratio. The SAGOLA 4000 range removes humidity and oil down to 0.01 microns and ensures minimal air pressure drop (maximum airflow: 1,700 L/min.)

Precision control

Easy to read pressure gauge with double scale, in bar and psi. High-precision regulation system with a large regulation handle. This makes it easy to handle, even with gloved hands.

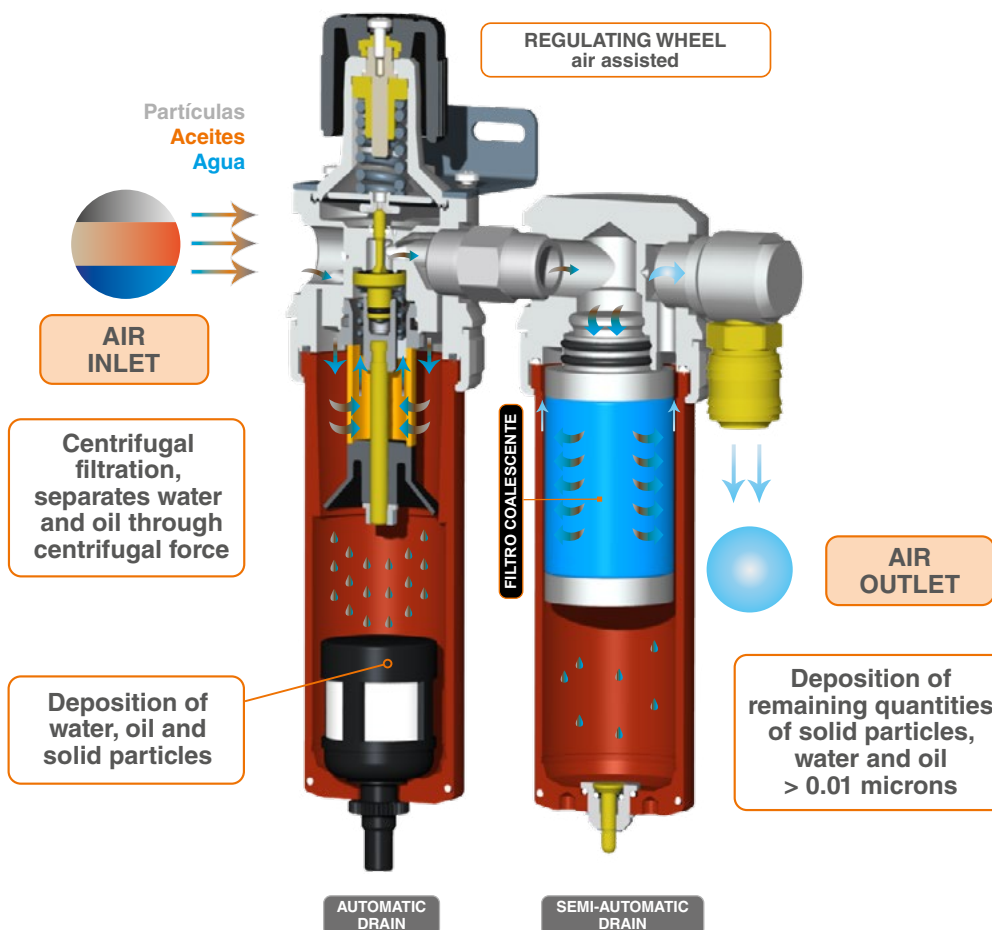

Reliable and easy to maintain

Made of machined aluminum with an anticorrosive treatment on the entire surface. The 4000 filter range is highly durable and requires minimal maintenance.

Automatic drain system

The combination of automatic drain in the first stage and semi-automatic in the second means that the level of condensate inside the filter is kept at very low levels.

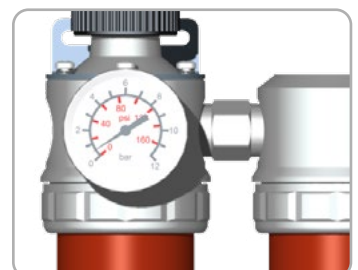

Complete 4000 Series Filtration System

Easy and simple to use. Tool-free disassembly.

Automatic drain system. Automatic drain of condensed liquids without manipulation.

High quality, easy to read manometer. Scale in bar and psi.

4000 range filters

4220 Plus Filter

Two stage air filter. Maximum filtering level. Recommended for last generation finishes. Waterborne paints, HS clearcoats and enamels, high gloss lacquers.

Highly reliable air regulation system. Regulating wheel for a better fit, even with gloves.

Manufactured from a solid aluminum block. Very robust, but light.

1st Stage. Filtration of water, oil and particles + 2nd Stage Submicron Filtering. 0.01 Microns.

Incorporates automatic purge of condensed liquids. High air flow.

Quality pressure gauge and easy to read.

REGULATIONS:

4220 Plus Air regulator filter with BSP 1/4" Nitto coupling (exclusive in Asia)	10750403

Quick couplings and connectors

Made of tempered steel with nitrile butadiene gasket, safe and hermetic closing system. Available in Euro-profile, US-Mil, Multi-profile and Nitto systems. Silicone-free joints. (See page 146)

Antistatic air hoses

Highly flexible and lightweight antistatic hose. Fastening hardware for maximum security. 8mm inner diameter, enough for any spraygun model. (See page 140)

4000 range filters

4120 / 4120 Plus Filter

Effective solution for compressed air filtration in professional paint booths for: car refinish, wood, machinery, plastics and industry in general.

Highly reliable air regulation system. Regulating wheel for a better fit, even with gloves.

Manufactured from a solid aluminum block. Very robust, but light.

Incorporates automatic purge of condensed liquids. High air flow. High quality manometer.

Water, oil and particulate removal by 20 micron sintered bronze filter. Friction and centrifugation filtering.

Mechanized body from solid aluminum

No diecast parts inside. High strength elements. Longer durability. Oversized air holes, bigger air flow and minimum pressure drops.

Machined aluminum vessel

High resistance anodized. Maximum durability. Minimum maintenance.

Oversized regulating wheel

Easy to use, even with gloves.

Anodized to avoid rusting

Not painted. Anodizing makes it to last longer. Very high resistance to rusting and any other chemical attack.

High quality and easy to read manometer

Double scale: bar and psi.

Automatic draining system

Automatic drain of condensed liquids without any handling.

Accessories for 4000 range filters

The filters in your filter equipment have a limited useful life. When filters become clogged, equipment performance can decrease. Therefore, we do not have a guarantee of 100% correct filtering.

Plus range filters

Sagola professional range in regulators, air purifiers, and air lubricators. Plus range has been exclusively designed and manufactured for professional use, it gathers high standard in performance and design.

Solid and mecanized aluminium body

We do not use cast parts. Sturdy elements. High durability. Over air paths size offering higher flow and minimum pressure drop.

Anodising treatment against oxidation

Painting to protect elements is avoided. This gives us endless life. Very high resistance to oxidation or other chemical attack.

Easy reading pressure gauge

Double scale bar/psi gauge.

Semi-automatic draining systems

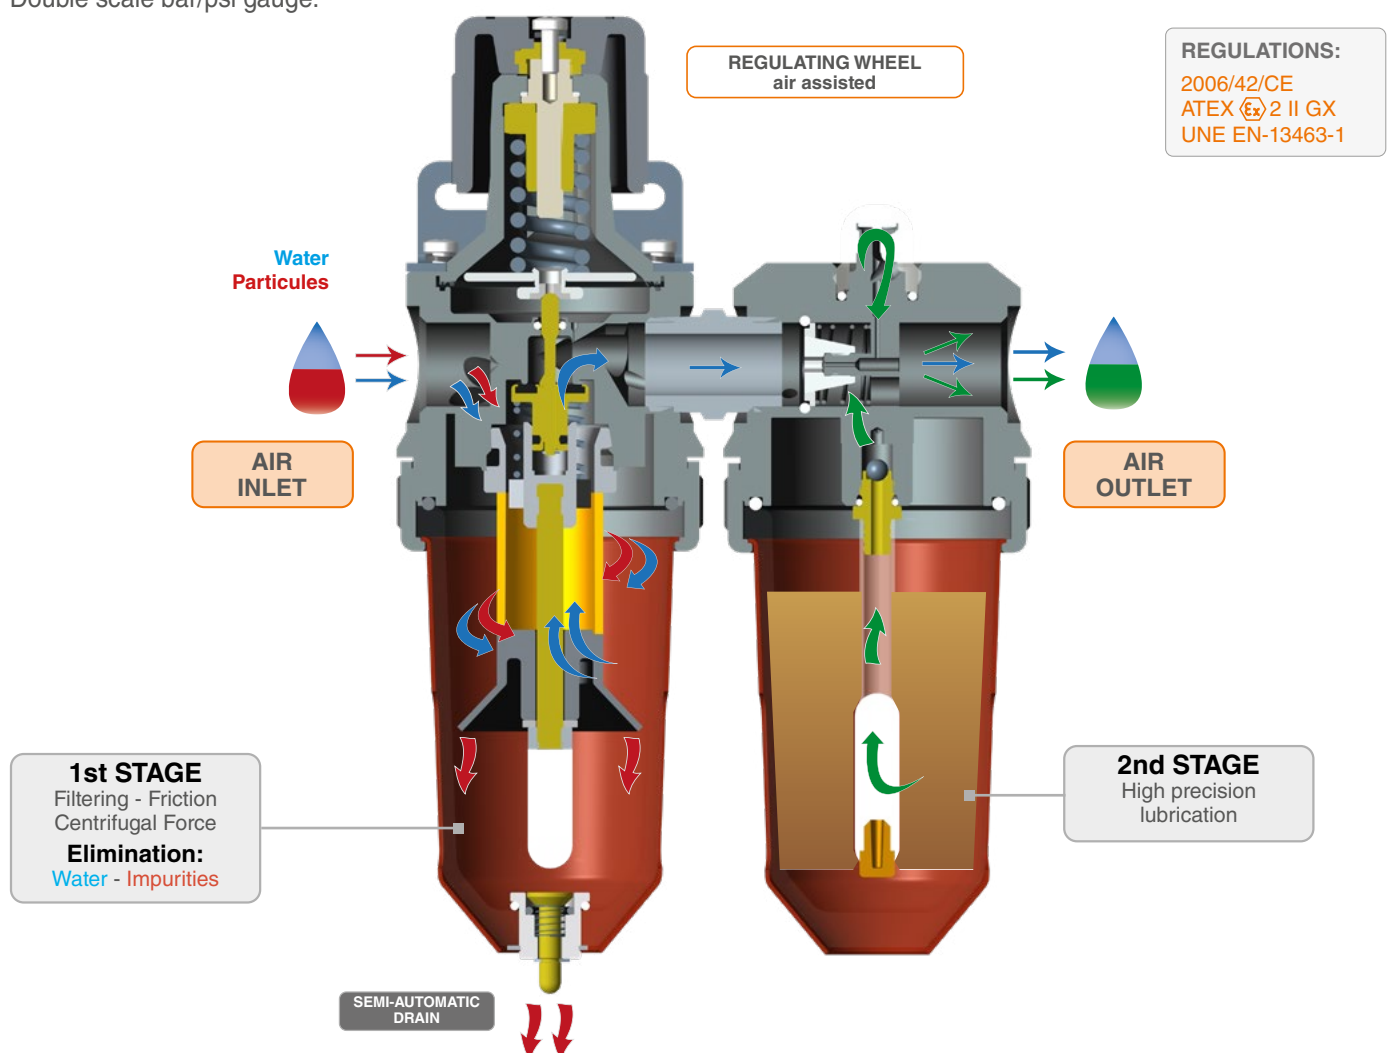

No manual draining.

Regulation handle

Oversized. Easy manipulations, even with gloves.

Polycarbonate vessel

High-resistant and high transparency. Does not yellow over time.

The Plus filter range lubrication system offers maximum smoothness of operation, maximum precision. Easy release, automatic pressure drop.

Air assisted regulator and continuous air supply.

Aluminium body. CNC mechanized. Sturdy build. Liquid and impurities holding.

Plus range filters

479 Plus Filter

The most compact solution for the small workshops, industry or priming and preparation areas.

Large air flow, maximum reliability regulating system, high quality pressure gauge, the best materials. Don't undervalue your small painting works or reduce the life of your pneumatic tools by using poor quality regulators and no filtration capacity.

Adaptable to any size of hose. It comes with reducers. Produced from a solid aluminium block, great filtering capacity with check window for waste particle and semi-automatic drain system, it has everything in a minimum space.

970 Plus Filter

The virtues of the regulator-filter 479+ is now linked to a lubricating element, setting itself apart as specific workshop equipment. It supplies clean, lubricated air to all your pneumatic tools.

Accurate control of the oil content by means of a "drop-by-drop" hand regulator, zero pressure loss thanks to the in-line design, maximum reliability and productivity in the most compact package.

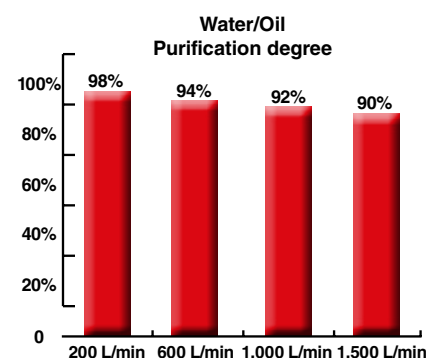

Assure the supply of clean air and properly lubricated to tools and pneumatic engines.

Plus range filters

430 Plus regulator

Mini air regulator. Small, robust, reliable and long lasting. Mechanized from a solid aluminium block.

Diaphragm regulator from 0 to 10 bar. High pressure regulator. Quality pressure gauge up to 10 bar. Double scale bar/psi.

Stand included for assembly on the wall. Standard adaptors and fittings included. Quick release and short shift wheel.

439 Plus Filter

High flow filter for insertion in air lines. Suitable for all type of installations, accessories included. Made of aluminium. High-durability.

Check window for waste liquids. Semi-automatic drain system. Minimum pressure loss.

Minimum maintenance.

437 Plus Lubricator

Ideal for the proper lubrication of pneumatic tools. Multiple inlet and outlet dimensions (1/2", 3/8" and 1/4"). Oil level check window.

Manual oil regulator by level check window, "drop by drop" system. CNC mechanized from a solid aluminium block. Made of aluminium, as the whole Plus range.

6

Compressed air complements

Antistatic hoses, connectors, quick couplings, records, elements that complement a good tool with quality and safe work for the painter and panel beater.

SSAGOLA knows that it is not worth taking risks and takes maximum care of this range.

Anti-static air hose

Anti-static compressed air hose ideal for painting in the booth. Light, flexible and manageable. Twist free.

EPDM rubber hose with exterior textile reinforcement

High security crimped ends able to bear the high temperatures of the booth. No need to use flanges, avoiding that they release or cause leaks due to dilation.

8 mm. inner diameter. Valid to work with high flow HVLP sprayguns.

1/4" F couplings with conical closure and flare fitting for easy assembly of the push connector.

REGULATIONS:
97/23/CE
UNE EN-559

Couplings and Connectors

The new range of plugs SAGOLA presents cutting-edge design. SAGOLA offers a wide range that gives cover 100% of market requirements. Is incorporated security versions. All steel and aluminum plugs are BSP; Males (BSPT) and females (BSPP).

Plug body made of treated steel and valve made of brass. So a guaranteed life of more than 1,500,000 uses. The new range of plugs SAGOLA incorporates a handle made of composite, which gives a high resistance to both attrition and drag. Attrition resistance tested in more than 48,000 impacts and the equivalent to a crawl 12 km.

1. **SHOOTER** made of composite with a weight reduction and extraordinary durability against impact.
2. **BODY PLUG** made of steel with anticorrosive treatment.
3. **VALVES** Brass valve manufactured, specific to work at high temperatures.
4. **JOINTS** Nitrile Butadiene. Operating temperature range: -20°C +100°C.
5. **PINS** made of tempered high strength steel that guarantees the absence of attrition.
6. **SPRING** made of stainless steel.

US-Mil range

**Quick coupling
US-Mil RANGE**

How to connect and disconnect the plug?

Standard plug connect and disconnect

1. Press until coupled

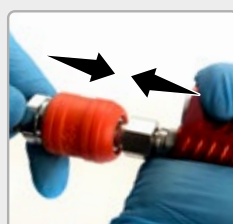

2. Pull the body as the arrow indicates

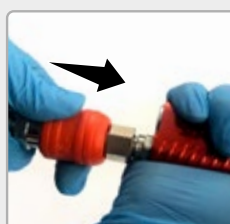

3. Disconnect the plug

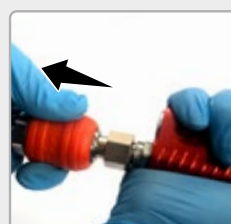

Safety plug connect and disconnect

1. Move plug and tool as indicated by arrows

2. Push the plug

3. Pull the plug

4. Disconnect the plug

General applications spray guns

Pneumatic tool of essential use in the body shop. Complete and high-quality service.

In this section we offer cord sealant guns, anti-gravel guns for underbody, blow guns and pressure check gun.

3900 Plus sealant guns

3900 Plus M6

3900 Plus M4

3900 Plus

3900 Plus sealant guns

The SAGOLA 3900 Plus pneumatic sealers are a compact, efficient and light solution for everyday needs in any workshop. These pneumatic guns are very useful when it comes to structure assembling, repairs and windshield set-ups, amongst others.

There are two versions: the 3900 Plus for sealants in cartridges and the 3900 Plus M4/6 for sealants in sausages. Both versions include a trigger with discharge valve, which guarantees a great precision and control.

The metallic internal parts assure a long working life. Besides, those parts do not require any manipulation neither any maintenance.

Its body is made of high resistance aluminum. The front part on the 3900 Plus is made of non-deformable plastic.

Very strong product capable to work for long working hours.

5. Close the deposit with the front cover

518 Pro anti-gravel gun

518 Pro anti-gravel gun

Professional pressurized pneumatic gun for antigravel cartridges and underbody protection.

Total regulation on product flow and quality of atomization and spray size. Air inflow regulator.

Operating pressure. The cartridge container is made in anodized aluminum. It is light and sturdy. Needle regulator to control precisely the texturing. Very accurate depressurizing valve. It is easy to handle even with gloves.

Special air cap for cavity wax, that includes two types of dispensers. (OPTIONAL). Stainless steel silencer.

The 518 Pro works with low pressure and offers the maximum regulation options and productivity.

L range pneumatic sanders

REGULATIONS:

2006/42/EC
 ISO 12100:2010
 ISO 11148-8:2011

L range pneumatic sanders

L range sanders have been designed for workshops where high performance and top quality finishes are demanded.

High performance Orbital pneumatic sanders. Light, compact and powerful. Profiled composite casing, comfortable and long-lasting.

With 360° rotatable rear air outlet, directing the air away from the operator. It is easily connected to central or portable extraction systems.

The L505 sander has been designed for quick grinding down, with a good quality surface finish.

The L252 is a sander which ensures high quality finishes without leaving any kind of marks on the surface.

And the L252R sander which ensures precision sanding and top quality finishing. It is ergonomic and light, perfect for those small retouches.

If you are looking for scratch-free quality, you can trust the L range. Due to the lubricant-free design, there is no concern about substrate contamination.

Sagola 472 PRO

There are many other guns that look like or are even true replicas of our 472 PRO Gun, but they are not a SAGOLA.

SAGOLA guarantees the best quality of painting.

SAGOLA guarantees the best quality of its components.

SAGOLA guarantees the best supply of spare parts.

SAGOLA offers you a 3-year guarantee.

This is what a SAGOLA gun offers.

The 472 PRO gun is designed for multi-use applications, always achieving the best quality finish even with highly viscous products.

Internal mix spray system on its two air nozzles. Nozzles with perfect uniformity and fan quality: flat jet and round jet. Ideal for 1 component products.

Easy to use and total portability.

**Flat
JET**

**Round
JET**

Deposit

The capacity of the deposit is 600 ml. Optimized paint zone deposit machining

Low air consumption

The lowest air consumption on the market. 65 L/min.

Air caps

Two types of air caps with a perfect uniformity and quality of fan. Flat fjet and round jet.

PREMIUM 777 Compressor

PATENTS:

Community Design: D-C 924667-0001
Design in Asia: 200830139663.7

SAGOLA recommends a series of products that together with your 472 PRO Gun will offer you a multitude of applications. That is why the recommendation of the PREMIUM 777

compressor is that, due to its lightness and size, this equipment will allow you to work anywhere without the need to transport large compressors.

Economic, ergonomic

The SAGOLA Junior G spraygun is a very economical gravity spray gun in contrast to its features.

Spraygun with a robust body. Lightweight and ergonomic exclusive design by Sagola.

Spraygun suitable for working with 1.5 HP power compressors. Very low air consumption.

Incorporates air, product and fan flow regulators. 600 ml. cup capacity. Quick connector included.

Two packaging formats, in box or blister.

BSPP 1/4"
quick connector
included

Turbo 1000

Turbine Turbo 1000

Autonomous HVLP painting equipment.

The equipment consists of a turbine, a gun and a hose. The gun rests on the turbine in the gun holder. It incorporates a cable collection system. The turbine body includes an accessory holder.

It incorporates two combinations of standard fluid nozzle. The air cap of the gun has four positions to achieve a vertical fan, flat fan or round jet. All of them are adjustable in size.

The generation of painting with hot air allows to work with a low level of dilution in the paints and a faster drying of these.

Painting equipment valid for all types of paints. Finishes, primers, multicolors,...

FR/FRL/RA range

Regulator filter FR

Air purifying filter with pressure regulator and manometer.

High precision regulation manometer. Polycarbonate vessel with high resistance metal protection with a capacity of 30 cm³.

The filtering system retains water and impurities. Filtered water by centrifugation. 40 micron particle filter. Great air flow.

Semi-automatic purge system.

Lubricator Regulator Filter FRL

Compact model that combines the FR range filter system with a lubricator.

Increases the life and optimizes the performance of pneumatic machinery. The FRL 404 model is recommended for tools and motors with high air consumption as well as for the work of several tools at the same time.

Regulator RA

Valid for all types of machinery.

It incorporates high precision and high quality regulation manometer. Constant airflow and pressure.

SAGOL

Accessories and consumables

Protection masks for sanding and painting processes, antistatic painter overalls...

The interest in ensuring optimal and safe working conditions is one of SAGOLA's current concerns.

Why multiply the management costs of paint, paper and cardboard packaging waste, for not being able to reduce their volume...? For this, Sagola presents you the Carton and Can Crushers.

Day to day in the workshop, sanding, paint preparation, masking, cabin maintenance,... daily actions on the bodywork but very important for a good result of the work.

From SAGOLA we want to contribute with our experience and service to help achieve it.

Antistatic coveralls

Sagola anti-static coverall

Antistatic coveralls of high comfort. Breathable.

Ventilation systems with slots in the back and in the armpits.

Adjustable hood with elastic band and velcro. Press-buttons neck closure. Adjustable feet closure. Large comfortable elastic wrist closures.

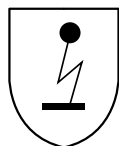

2-way zip and flap fitted. Includes 2 chest pockets, 2 side pockets, 1 hip pocket and 1 inside pocket.

Original Dupont Teflon coating (water repellent and dirt-resistant).

Silicone and lint free.

MP300 breathing mask

MP300 breathing mask

The MP300 mask and A1 filter set has been designed to provide maximum protection against inhalation of organic products with a boiling point over 65°C, without inconveniencing users in any way, enabling them to carry out their work in complete comfort.

The set adapts perfectly to all kinds of expressions and movements, always providing the highest possible level of protection.

The set is made up of a mask and two filters and covers the user's nose, mouth and chin. It is manufactured using light, highly resistant materials that do not have any harmful effects on users' health and hygiene.

The main body of the mask is made from soft natural rubber.

The mask is fitted with an exhaling valve made up of a valve-holder and a membrane, which makes it easier for exhaled air to escape.

It has a comfortable neck strap and head strap that can be easily adjusted to the right length.

REGULATIONS:

EN 140: 1998, EN 143:2000/A1:2006,

Classic MP2 breathing mask

Classic MP2 breathing mask

The Classic MP2 mask and A1 filter set has been designed to provide maximum protection against inhalation of organic products with a boiling point over 65°C, without inconveniencing users in any way, enabling them to carry out their work in complete comfort.

The set adapts perfectly to all kinds of expressions and movements, always providing the highest possible level of protection.

The double air inlet through the two filters allows inhalations of a higher air flow, making breathing easier.

Composed of a mask and two filters, it covers the user's nose, mouth and chin. Manufactured with lightweight and highly resistant materials.

Equipped with an exhalation valve that allows easy expulsion of air when breathing.

Elastic strap for a firm and comfortable fit.

FFP2 mask

REGULATIONS:

UNE-EN 149:2001 + A1:2009 (FFP2)
 Directive EPI UE 2016/425

M200/M210 mask FFP2 Protection

M200 and M210 self-filtering paper masks with FFP2 level protection. These masks are designed for protection against solid and liquid particles of low and medium toxicity.

Suitable for use against non-ferrous metal dust, metal welding fumes, gases and mists of different materials such as lead, aluminum and manganese.

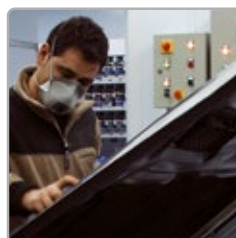

The mask body contains a flexible metal bar for a perfect fit in the nose area.

Adjustment to the head by double elastic band.

The M210 mask incorporates an exhalation valve to make breathing easier.

VERSIONS

Description	Units/Box	Code
M200 Mask	20	40000263
M210 Mask (with valve)	10	40000264

Sanding

Painting

The mask can be used in pollution concentrations up to 10 times the Occupational Exposure Limit (OEL).

Crushers

Waste management system

Can Crusher

Significant space saving and cost reduction in waste management.

Designed to solve residue storage and disposal problems in places like bodyshops, industrial workshops, garages, etc...

Top load. Greater working comfort.

Valid for cylindrical recipients up to 25L. (maximum height 45 cm. and 31 cm. diameter).

**Code**

40000314

Can and carton crusher

Two accesses:

> Upper: loads cardboard and paper.

> Lower: unloads cardboard, loads cans.

Reel of string at rear to tie the crushed bundles of paper and cardboard.

**Code**

40000315

TECHNICAL DATA

	Can Crusher		Can and carton crusher	
Dimensions	54 x 51 x 146 cm.	21.3 x 20.1 x 49.6"	60 x 75 x 175 mm.	23.6 x 29.5 x 68.9"
Weight	185 Kg.	408 lbs	225 Kg.	496 lbs
Cylinder (Stroke)	500 mm.	19.7"	600 mm.	23.6"
Ø Cylinder	160 mm.	6.3"	160 mm.	6.3"
Pressing power	> 1,600 Kg.	> 3,527 lbs	> 1,600 Kg.	> 3,527 lbs
Internal volume	-	-	approx. 210,000 c.c.	approx. 55.47 gal
Working pressure	8 bar	116 psi	8 bar	116 psi
Control / Safety system	Pneumatic		Pneumatic	

Paper paint-strainers

Paper paint-strainers for fast and perfect filtering of the paint.
 Paper paint-strainers with 125 or 190 microns Nylon mesh.
 To obtain a quick filtering and a surface without speckles.
 Supplied in plastic bag to keep them always clean.

VERSIONS

Description	Application	Code
190 µm p. p. strainers	Clearcoats / single stage	40000253
125 µm p. p. strainers	Waterborne paints	40000254

Mixing cups and lids

Cups with legs to prevent spillage. Reinforced top edge.
 Made of polypropylene. High resistance.

Product mixers

Product mixers of 20 and 30 cm. of length.

VERSIONS

Description	Units/Box	Code
20 x 2 cm. product mixer	500	40000499
30 x 2 cm. product mixer	200	40000320

Particle removal kit

It is used to remove any particles of dust or dirt that may fall on the fresh paint.

Booth anti-dust. 10 liters

Product for protecting the walls, screens and glass of a spray booth.

- Protects from spray and dust.
- Application with spray gun, roller or brush.
- Transparent and self adhesive layer.
- Clean product.
- Easily removable with water.
